AUDITORS' REPORT TO THE MEMBERS

We have audited the annexed consolidated financial statements comprising consolidated Balance Sheet of ADAMJEE INSURANCE COMPANY LIMITED ("the Holding Company") and its subsidiary company (together referred to as "Group") as at 31 December 2010 and the related consolidated Profit and Loss Account, consolidated Statement of Comprehensive Income, consolidated Statement of Changes in Equity, consolidated Cash Flow Statement, consolidated Statement of Premiums, consolidated Statement of Claims, consolidated Statement of Expenses and consolidated Statement of Investment Income together with the notes forming part thereof, for the year then ended. We have also expressed separate opinion on the financial statements of Adamjee Insurance Company Limited. The financial statements of subsidiary company Adamjee Life Assurance Company Limited were audited by another firm of auditors whose report has been furnished to us and our opinion, in so far as it relates to the amounts included for such company, is based solely on the report of such other auditors. These consolidated financial statements are the responsibility of the Holding Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our audit was conducted in accordance with the International Standards on Auditing and accordingly included such tests of accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the consolidated financial statements present fairly the financial position of ADAMJEE INSURANCE COMPANY LIMITED and its subsidiary company as at 31 December 2010 and the results of their operations for the year then ended.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

1. THE GROUP AND ITS OPERATIONS

The group consists of:

Holding company

Adamjee Insurance Company Limited

Subsidiary company

Adamjee Life Assurance Company Limited

Percentage holding of Adamjee Insurance Company Limited

55%

Adamjee Insurance Company Limited (holding company)

Adamjee Insurance Company Limited (holding company) is a public limited company incorporated in Pakistan on 28 September 1960 under the Companies Act, 1913 (now Companies Ordinance, 1984). The company is listed on all the stock exchanges in Pakistan and is engaged in the non-life insurance business.

The registered office of the company is situated at Adamjee House, I.I. Chundrigar Road, Karachi.

The Company also operates branches in the United Arab Emirates (UAE), the Kingdom of Saudi Arabia (KSA) and the Export Processing Zone (EPZ). The branch in the KSA has closed down its operations and is in "run-off" status with effect from 01 October 2003.

Adamjee Life Assurance Company Limited (subsidiary company)

Adamjee Life Assurance Company Limited (subsidiary company) was incorporated in Pakistan on 4 August 2008 as a public unlisted company under the Companies Ordinance, 1984 and started its operations from 24 April 2009. The registered office of the Company is located at MCB Building, Jinnah Avenue, Blue Area, Islamabad while its principal place of business is located at third floor, The Forum, Khayaban-e-Jami, Clifton, Karachi. The Company is a subsidiary of Adamjee Insurance Company Limited and an associate of IVM Intersurer B.V. who have a holding of 55% and 45% respectively in the share capital of the Company. IVM Intersurer B.V. has nominated Hollard Life Assurance Company Limited (HLA), a subsidiary of IVM Intersurer B.V., to act on its behalf. HLA is South Africa's largest private sector insurance company.

The Company is engaged in life assurance business carrying on non-participating business only. In accordance with the requirements of the Insurance Ordinance, 2000, the Company has established a shareholders' fund and the following statutory funds in respect of its each class of life assurance business:

- Conventional Business
- Accident and Health
- Non-Unitized Investment Link Business

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied in the preparation of these consolidated financial statements are set out below:

2.1 Basis of preparation

a) Statement of compliance

These consolidated financial statements are prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984, provisions of and directives issued under the Companies Ordinance, 1984, the Insurance Ordinance, 2000 and SEC (Insurance) Rules, 2002. In case requirements differ, the provisions or directives of the Companies Ordinance, 1984, Insurance Ordinance, 2000 and SEC (Insurance) Rules, 2002 shall prevail.

The SECP has allowed insurance companies to defer the application of International Accounting Standard - 39 (IAS 39) 'Financial Instruments: Recognition and Measurement' in respect of "investments available-for-sale" until suitable amendments have been made in the laws. Accordingly, the requirements of IAS-39, to the extent allowed by SECP, have not been considered in the preparation of these consolidated financial statements.

b) Consolidation

i) Subsidiary Company

Subsidiary company is the entity in which holding company directly or indirectly controls beneficially owns or holds more than 50% of the voting securities or otherwise has power to elect and appoint more than 50% of its directors. The financial statements of the subsidiary company are included in the consolidated financial statements from the date the control commences until the date that control ceases.

The assets and liabilities of subsidiary company have been consolidated on a line by line basis and carrying value of investments held by the holding company is eliminated against holding company's share in paid up capital of the subsidiary company.

Intergroup balances and transactions have been eliminated.

Non-controlling interests are that part of net results of the operations and of net assets of subsidiary company attributable to interest which are not owned by the holding company. Non-controlling interests are presented as separate item in the consolidated financial statements.

ii) Associates

Associates are the entities over which the Group has significant influence but not control. Significant influence is generally considered where shareholding percentage is between 20% to 50% of the voting shares. However, such significant influence can also arise where shareholding is lesser than 20% but due to other factors e.g. group's representation on the board of directors of investee Company, the Group can exercise significant influence.

Group's investment in "Lalpir Power Limited" and "Pakgen Power Limited" have been considered as investment in associates as the holding company has two directors each, in common, at the board of directors of each of such associated companies besides holding 8% shareholding each in the voting shares.

Investments in these associates are accounted for using the equity method of accounting and are initially recognized at cost. The Group's investment in associate includes goodwill identified on acquisition, net of any accumulated impairment loss, if any.

The Group's share of its associate's post-acquisition profits or losses, movement in other comprehensive income, and its share of post-acquisition movements in reserves is recognized in the profit and loss account, statement of comprehensive income and reserves respectively. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Distributions received from an associate reduce the carrying amount of the investment.

c) Accounting convention

These consolidated financial statements have been prepared under the historical cost convention except that certain investments which are stated at lower of cost and market value and valuation of policy holders liability and employees' retirement benefits which are carried on the basis of actuarial valuation. Accrual basis of accounting has been used except for cash flow information.

d) Critical accounting estimates and judgments

The preparation of consolidated financial statements in conformity with approved accounting standards as applicable in Pakistan requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires management to exercise judgment in application of its accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements or judgment was exercised in application of accounting policies are as follows:

i) Provision for outstanding claims including incurred but not reported (IBNR)

Provision for liability in respect of unpaid reported claims is made on the basis of individual case estimates. Provision for IBNR is based on the management's best estimate which takes into account the past trends, expected future patterns of reporting of claims and the claims actually reported subsequent to the reporting date.

ii) Provision for taxation including the amount relating to tax contingency

In making the estimates for income tax currently payable by the Group, the management takes into account the current income tax law and the decisions of appellate authorities on certain issues in the past.

iii) Provision for doubtful receivables

The receivable balances are reviewed against any provision required for any doubtful balances on an ongoing basis. The provision is made while taking into consideration expected recoveries, if any.

iv) Useful lives, patterns of economic benefits and impairments - Fixed Assets

Estimates with respect to residual values and useful lives and patterns of flow of economic benefits are based on the analysis of the management of the Group. Further, the Group reviews the value of assets for possible impairment on an annual basis. Any change in the estimates in the future might affect the carrying amount of respective item of property, plant and equipment, with a corresponding effect on the depreciation charge and impairment.

v) Actuarial valuation of liabilities

The actuarial calculations are involved in determination of policy holders' liability arising from life insurance business and the working of provision for defined benefit plans that are based on certain actuarial assumptions.

vi) Classification of investments

The Group classifies its investments into "available-for-sale", "held to maturity" and "at fair value through profit or loss". The classification is determined by management at initial recognition and depends on the purpose for which the investments are acquired.

vii) Others

Other significant estimates include valuation discount rate, mortality assumptions, surrenders and impairment pertaining to subsidiary company.

e) Functional and presentation currency

Items included in these consolidated financial statements are measured using the currency of the primary economic environment in which the Group operates. These consolidated financial statements are presented in Pak Rupees, which is the Group's functional and presentation currency.

f) Standards, interpretations and amendments that are effective in current year

Standards and amendments to published approved accounting standards that are effective in the current period and relevant to the company have no significant impact on these consolidated financial statements and are therefore not detailed in these consolidated financial statements.

IFRS 7 (Amendment) 'Financial instruments: Disclosures' (effective for annual periods beginning on or after 01 January 2009). This amendment requires enhanced disclosures about fair value measurement and liquidity risk. In particular, the amendment requires disclosure of fair value measurements by level of a fair value measurement hierarchy. As the change in accounting policy only results in additional disclosures, there is no impact on earnings per share.

g) Standards, interpretations and amendments to published approved accounting standards that are effective in current year but not relevant

There are new standards, interpretations and amendments to the published approved accounting standards that are mandatory for accounting periods beginning on or after 01 January 2010 but are considered not to be relevant or do not have any significant impact on these consolidated financial statements and are therefore not detailed in these consolidated financial statements.

h) Standards, interpretations and amendments to published approved accounting standards that are not yet effective but relevant:

Following standard and amendments to existing standards have been published and are mandatory for the Group's accounting periods beginning on or after 01 January 2010 or later periods:

IFRS 9 'Financial Instruments' (effective for annual accounting periods beginning on or after 01 January 2013). IFRS 9 has superseded the International Accounting Standard (IAS) 39 'Financial Instruments: Recognition and Measurement'. It requires that all equity investments are to be measured at fair value while eliminating the cost model for unquoted equity investments. Certain categories of financial instruments available under IAS 39 will be eliminated. Moreover, it also amends certain disclosure requirements relating to financial instruments under IFRS 7, 'Financial Instruments: Disclosures'. The Group's management is in the process of evaluating impacts of the aforesaid standard on these consolidated financial statements.

There are other amendments resulting from annual improvements project initiated by International Accounting Standards Board in May 2010, specifically in IFRS 7, IAS 1 'Presentation of Financial Statements', IAS 24 'Related Party Disclosures' and IAS 36 'Impairment of Assets' that are considered relevant to the Group's consolidated financial statements. These amendments are unlikely to have a significant impact on these consolidated financial statements and have therefore not been analyzed in detail.

i) Standards, interpretations and amendments to published approved accounting standards that are not effective in current year and not considered relevant:

There are other accounting standards, amendments to published approved accounting standards and new interpretations that are mandatory for accounting periods beginning on or after 01 January 2010 but are considered not to be relevant or do not have any significant impact on these consolidated financial statements and are therefore not detailed in these consolidated financial statements.

2.2 Insurance contracts

Insurance contracts are those contracts where the Group (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its life time, even if the insurance risk reduces significantly during this period, unless all rights and liabilities are extinguished or expired.

The Group neither issues investment contracts nor does it issue insurance contracts with discretionary participation features (DPF).

2.2.1 Premium

Holding company

Premium received / receivable under a policy is recognized as written from the date of attachment of the policy to which it relates. Premium income under a policy is recognized over the period of insurance from inception to expiry as follows:

- (a) For direct business, evenly over the period of the policy;
- (b) For proportional reinsurance business, evenly over the period of underlying insurance policies; and
- (c) For non-proportional reinsurance business, in accordance with the pattern of the reinsurance service.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

Where the pattern of incidence of risk varies over the period of the policy, premium is recognized as revenue in accordance with the pattern of the incidence of risk.

Administrative surcharge is recognized as premium at the time the policies are written.

Provision for unearned premium represents the portion of premium written relating to the unexpired period of coverage and is recognized as a liability by the company. This liability is calculated as follows:

- for marine cargo business and for motor business in Dubai, as a ratio of the unexpired period to the total period of the policy applied on the gross premium of the individual policies; and
- for other classes / lines of business, by applying the twenty-fourths method as specified in the SEC (Insurance) Rules, 2002, as majority of the remaining policies are issued for a period of one year.

Receivables under insurance contracts are recognized when due, at the fair value of the consideration receivable less provision for doubtful debts, if any. Provision for impairment on premium receivables is established when there is objective evidence that the company will not be able to collect all amounts due according to original terms of receivable. Receivables are also analyzed as per their ageing and accordingly provision is maintained on a systematic basis.

Subsidiary company

Premiums are recognized once the related policies have been issued and the premiums have been received. Single premiums are recognized once the related policies are issued against the receipt of premium. Group life premiums are recognized when due.

A provision for unearned premiums is included in the policyholders' liabilities.

Premium due but unpaid is recognized at cost, which is the fair value of the consideration receivable, less provision for impairment, if any.

2.2.2 Reinsurance Ceded

Holding company

The reinsurance contracts are entered into the normal course of business in order to limit the potential for losses arising from certain exposures. Outward reinsurance premiums are accounted for in the same period as the related premiums for the direct or accepted reinsurance business being reinsured.

Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the related reinsurance contract. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the provision for outstanding claims or settled claims associated with the reinsurance policies and are in accordance with the related reinsurance contract.

Reinsurance assets are not offset against related insurance liabilities. Income or expenses from reinsurance contract are not offset against expenses or income from related insurance assets.

Reinsurance assets or liabilities are derecognized when the contractual rights are extinguished or expired.

Reinsurance assets are assessed for impairment on each reporting date. If there is an objective evidence that the reinsurance asset is impaired, the carrying amount of the reinsurance asset is reduced to its recoverable amount and impairment loss is recognized in the profit and loss account.

The portion of reinsurance premium not recognized as an expense is shown as a prepayment.

Commission income from reinsurers is recognized at the time of issuance of the underlying insurance policy by the Group. This income is deferred and brought to account as revenue in accordance with the pattern of recognition of the reinsurance premium to which it relates. Profit commission, if any, which may be entitled to under the terms of reinsurance, is recognized on accrual basis.

Subsidiary company

Reinsurance expense is recognized as a liability in accordance with the pattern of recognition of related premium and is measured in line with the terms and conditions of the reinsurance treaty.

2.2.3 Claims expense

Holding company

General insurance claims include all claims occurring during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, (if any) and any adjustments to claims outstanding from previous years.

The liability in respect of all claims is recognized upto the reporting date which is measured at the undiscounted value of the expected future payments. The claims are considered to be incurred at the time of the incident giving rise to the claim except as otherwise expressly indicated in the insurance contract. The liability for claims include amounts relating to unpaid reported claims, claims incurred but not reported (IBNR) and expected claims settlement costs.

Subsidiary company

Claims are recognized on the earlier of the policy expiry or the date when the intimation of the event giving rise to the claim is received except for accident and health claims which are recognized as soon as a reliable estimate of the claim amount can be made.

Claims liability includes amounts in relation to unpaid reported claims and estimated claims settlement cost. Full provision is made for the estimated cost of claims incurred to the date of the balance sheet.

2.2.4 Reinsurance recoveries against outstanding claims

Claims recoveries receivable from the reinsurer are recognized as an asset at the same time as the claims which give rise to the right of recovery are recognized as a liability and are measured at the amount expected to be received.

2.2.5 Commission expense and other acquisition costs

Holding company

Commission expense and other acquisition costs are charged to profit and loss account at the time the policies are accepted.

Subsidiary company

These are costs incurred in acquiring insurance policies, maintaining such policies, and include without limitation all forms of remuneration paid to insurance agents.

Commission and other expenses are recognized as expense in the earlier of the financial year in which they are paid and financial year in which they become due and payable, except that commission and other expenses which are directly referable to the acquisition or renewal of specific contracts are recognized not later than the period in which the premium to which they refer is recognized as revenue.

2.2.6 Premium Deficiency Reserve

The Group maintains a provision in respect of premium deficiency for the class of business where the unearned premium liability is not adequate to meet the expected future liability, after reinsurance, from claims and other supplementary expenses expected to be incurred after the reporting date in respect of the unexpired policies in that class of business at the reporting date.

The movement in the premium deficiency reserve is recorded as an expense / income in profit or loss account for the year.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

For this purpose, loss ratios for each class are estimated based on historical claim development. Judgment is used in assessing the extent to which past trends may not apply in future or the effects of one-off claims. If these ratios are adverse, premium deficiency is determined. The loss ratios estimated by holding company on these basis for the unexpired portion are as follows:

| | |
|--------------------------------|--------|
| Fire and property damage | 70.38% |
| Marine, aviation and transport | 50.74% |
| Motor | 70.40% |
| Miscellaneous | 74.55% |

Based on an analysis of combined operating ratio for the expired period of each reportable segment, the management considers that the unearned premium reserve for all classes of business as at the year end is adequate to meet the expected future liability after reinsurance, from claims and other expenses expected to be incurred after the balance sheet date in respect of policies in those classes of business in force at the balance sheet date. Hence, no reserve for the same has been made in these financial statements.

Due to initial years of operations, subsidiary company has not calculated such loss ratios as any such amounts are at present not likely to be material.

2.3 Staff retirement benefits

Holding company

2.3.1 Defined contribution plan

The company operates an approved contributory provident fund scheme for all its eligible employees. Equal monthly contributions to the fund are made by the company and the employees at the rate of 8.33% of basic salary.

2.3.2 Defined benefit plans

The holding company following defined benefit plans:

- (a) an approved funded gratuity scheme for all its permanent employees in Pakistan. Annual contributions are made to the schemes on the basis of actuarial recommendations. The actuarial valuation is carried out using the projected unit credit method. Actuarial gains and losses are amortized over the expected future service of the current members. Gratuity is payable to staff on completion of the prescribed qualifying period of service under the scheme;
- (b) unfunded gratuity schemes covering the employees in the Dubai as per the requirements of the applicable regulations. Provision is made in the financial statements based on the management's best estimate of the liability in respect of these schemes.

Subsidiary company

Defined benefit scheme

The Company operates an unfunded gratuity scheme covering eligible employees whose period of employment with the Company is six months or more. The liability recognized in the balance sheet in respect of the defined benefit scheme is the present value of the defined benefit obligation at the balance sheet date together with adjustments for unrecognized actuarial gains or losses. The defined benefit obligation is determined annually by the appointed actuary using projected unit credit method.

Actuarial gains / losses in excess of ten percent of the higher of actuarial liabilities at the end of last reporting year are recognized over the average lives of employees.

2.4 Employees' compensated absences

The Group accounts for these benefits in the period in which the absences are earned.

2.5 Creditors, accruals and provisions

Liabilities for creditors and other amounts payable are carried at cost which is the fair value of the consideration to be paid in the future for the goods and / or services received, whether or not billed to the group.

Provisions are recognized when there is a present, legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

2.6 Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost. For the purpose of cash flow statement, cash and cash equivalents comprise of cash and bank deposits and short-term bank borrowings and excludes bank balances held under lien.

2.7 Investments

All investments are initially recognized at cost being the fair value of the consideration given and include transaction costs except in case of investments at fair value through profit or loss. All purchases and sales of investments that require delivery within the time frame established by regulations or market convention are accounted for at the trade date. Trade date is the date when the Group commits to purchase or sell the investment:

The above investments are classified into the following categories:

2.7.1 Held-to-maturity

Investments with fixed or determinable payments and fixed maturity, where the management has both the intent and the ability to hold the investments to maturity, are classified as held-to-maturity.

Subsequent to initial recognition at cost, these investments are measured at amortized cost less any accumulated impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition by using the effective interest rate method.

2.7.2 Available-for-sale

Investments which are intended to be held for an undefined period of time but may be sold in response to the need for liquidity, changes in interest rates, equity prices or exchange rates are classified as available-for-sale.

Subsequent to initial recognition at cost, these are stated at the lower of cost or market value (market value being taken as lower if the reduction is other than temporary) in accordance with the requirements of the SEC (Insurance) Rules, 2002. The holding company uses stock exchange quotations at the balance sheet date to determine the market value of its quoted investments. From the current year, the holding company uses appropriate valuation techniques to estimate the fair value of unquoted investments in delisted / unlisted companies. Such valuation is obtained from independent valuers. Previously, the fair value of unquoted investments in delisted / unlisted companies was determined by reference to the net assets and financial position of the investee on the basis of the latest available audited financial statements. The holding company changed the accounting estimate for more appropriate determination of the fair values of unquoted available for sale investments. This change has no impact on the consolidated financial statements.

However, in case of Government securities the market value is determined using rates announced by the Financial Market Association.

In case of fixed income securities redeemable at a given date where the cost is different from the redemption value, such difference is amortized uniformly over the period between the acquisition date and the date of maturity in determining 'cost' at which these investments are stated as per the requirements of the SEC (Insurance) Rules, 2002.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

2.7.3 At fair value through profit or loss

A financial asset is classified into the 'financial assets at fair value through profit or loss' category at inception if acquired principally for the purpose of selling in the short term, if it forms part of a portfolio of financial assets in which there is evidence of short term profit taking, or if so designated by the management. Subsequently, these are measured at fair value and gains and losses arising from change in fair value are included in the profit and loss account / revenue account.

2.8 Taxation

2.8.1 Current

Provision for current taxation is based on taxable income at the current rates of taxation after taking into account tax credits and rebates available, if any. The charge for the current taxation also includes adjustments where considered necessary, relating to prior years which arise from assessments framed / finalized during the year or required by any other reason.

2.8.2 Deferred

Deferred tax is accounted for using the balance sheet liability method in respect of all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax is charged or credited in the profit and loss account, except in the case of items credited or charged to statement of comprehensive income in which case it is taken to statement of comprehensive income.

2.9 Fixed assets

2.9.1 Tangible

Owned fixed assets, other than freehold land which is not depreciated and capital work-in-progress, are stated at cost, signifying historical cost, less accumulated depreciation and any provision for impairment. Freehold land and capital work-in-progress are carried at cost less impairment losses, if any. Depreciation is charged to income applying varying methods depending upon the nature of the asset, at the rates specified for calculation of depreciation after taking into account residual value, if any. The useful lives, residual values and depreciation method are reviewed, and adjusted if appropriate, at each reporting date.

Assets subject to finance lease are accounted for by recording the assets at the lower of present value of minimum lease payments under lease agreements and the fair value of asset at the inception of the lease contract. The related obligation under the lease is accounted for as liability. Financial charges are allocated to accounting period in a manner so as to provide a constant periodic rate of charge on the outstanding liability.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit and loss account as and when incurred.

Depreciation on additions is charged from the month the assets are available for use while on disposals, depreciation is charged up to the month in which the assets are disposed off.

The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate that this carrying value may not be recoverable. If any such indications exist and where the carrying values exceed the estimated recoverable amounts, the assets are written down to their recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount of the assets disposed off. These are included in the profit and loss account currently.

2.9.2 Intangible

These are stated at cost less accumulated amortization and any provision for impairment.

Amortization is calculated from the month the assets are available for use using the straight-line method, whereby the cost of the intangible asset is amortized over its estimated useful life over which economic benefits are expected to flow to the company. The useful life and amortization methods are reviewed, and adjusted if appropriate, at each balance sheet date.

Software development costs are only capitalized to the extent that future economic benefits are expected to be derived by the Group.

The carrying values of intangible assets are reviewed for impairment when events or changes in circumstances indicate that this carrying value may not be recoverable. If any such indications exist and where the carrying values exceed the estimated recoverable amounts, the assets are written down to their recoverable amount.

2.10 Expenses of management

Holding company

Expenses of management allocated to the underwriting business represent directly attributable expenses and indirect expenses allocated to the various classes of business on the basis of net premium revenue. Expenses not allocable to the underwriting business are charged as administrative expenses.

Subsidiary company

Expenses of management have been allocated to various classes of business as deemed equitable by the management. Allocation to each segment is based on the nature of the expense and its correlation to each segment.

2.11 Investment income

2.11.1 Income from available-for-sale investments

- **Return on fixed income investments**
Return on fixed income securities classified as available-for-sale is recognized on a time proportion basis.
- **Dividend**
Dividend income is recognized when the right to receive the dividend is established.
- **Gain / loss on sale of available-for-sale investments**
Gain / loss on sale of available-for-sale investments is recognized in profit and loss account currently.
- **Return on Term Finance Certificates**
The difference between the redemption value and the purchase price of the Term Finance Certificates is amortized and taken to the profit and loss account over the term of the investment.

2.11.2 Income from held-to-maturity investments

Income from held-to-maturity investments is recognized on a time proportion basis taking into account the effective yield on the investments.

2.11.3 At fair value through profit or loss

Gain or loss on sale of investment is included in profit and loss account or respective revenue account of the fund in the period in which disposal has been made.

2.11.4 Share of profit from associated companies

This is recognized as per policy stated in note 2.1 b (ii).

2.12 Foreign currencies

Transactions in foreign currencies (other than the result of foreign branches) are accounted for in Pak Rupees at the rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Pak Rupees at the rates of exchange prevailing at the reporting date. Exchange differences are taken to the profit and loss account currently.

The assets and liabilities of foreign branches are translated to Pak Rupees at exchange rates prevailing at the balance sheet date. The results of foreign branches are translated to Pak Rupees at the average rate of exchange for the year. Translation gains and losses are included in the profit and loss account, except those arising on the translation of the net investment in foreign branches, which are taken to the capital reserves (exchange translation reserve).

2.13 Financial instruments

Financial assets and liabilities are recognized at the time when the Group becomes a party to the contractual provisions of the instrument and de-recognized when the Group loses control of contractual rights that comprise the financial assets and in the case of financial liabilities when the obligation specified in the contract is discharged, cancelled or expired. Any gain or loss on the de-recognition of the financial assets and liabilities is included in the profit and loss account currently.

Financial instruments carried on the balance sheet include cash and bank, loans, investments, premiums due but unpaid, amounts due from other insurers / reinsurers, premium and claim reserves retained by cedants, accrued investment income, reinsurance recoveries against outstanding claims, sundry receivables, provision for outstanding claims, amounts due to other insurers / reinsurers, accrued expenses, other creditors and accruals, liabilities against assets subject to finance lease and unclaimed dividends. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

2.14 Dividend and appropriation to reserves

Dividend and appropriation to reserves are recognized as liability in the Group's consolidated financial statements in the year in which these are approved.

2.15 Off setting

A financial asset and a financial liability is offset and the net amount is reported in the balance sheet when there is a legally enforceable right to set-off the recognized amounts and it is intended either to settle on a net basis or to realize the asset and settle the liability simultaneously.

2.16 Earnings per share

The Group presents basic earnings per share (EPS) for its shareholders. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the holding company by the weighted average number of ordinary shares outstanding during the period / year.

2.17 Share Capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

2.18 Impairment

The carrying amount of the assets is reviewed at each balance sheet date to determine whether there is any indication of impairment of any asset or a group of assets. If such indication exists, the recoverable amount of such assets is estimated and the impairment losses are recognized in the profit and loss account currently.

Provisions for impairment are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Changes in the provisions are recognized as income / expense currently.

2.19 Segment reporting

Holding company

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision makers (the board of directors) who is responsible for allocating resources and assessing performance of the operating segments.

The segment reporting is accounted for using the classes of business as specified under the Insurance Ordinance, 2000 and the SEC (Insurance) Rules, 2002 as the primary reporting format based on the practice of reporting to the management on the same basis.

Assets, liabilities and capital expenditures that are directly attributable to segments have been assigned to them while the carrying amount of certain assets used jointly by two or more segments have been allocated to segments on a reasonable basis. Those assets and liabilities which cannot be allocated to a particular segment on a reasonable basis are reported as unallocated corporate assets and liabilities.

Subsidiary company

The Company operates in Pakistan only. The subsidiary company has three primary business segments for reporting purposes namely; Conventional Business, Accident and Health Business and Non-unitized Investment Linked Business. The Company accounts for segment reporting using the classes or sub-classes of business (Statutory Funds) as specified under the Insurance Ordinance 2000 and SEC (Insurance) Rules, 2002 as the primary reporting format.

The Conventional Business segment includes Individual Life and Group Life. The Individual Life business provides life assurance coverage to individuals under conventional policies issued by the Company. The Group Life business provides life assurance coverage to members of business enterprises and corporate entities under group life insurance schemes issued by the Company and insurance coverage to a group of members or subscribers registered under a common platform.

Accident and Health business segment provides fixed pecuniary benefits or benefits in the nature of indemnity or a combination of both in case of accident or sickness to individuals.

Non-unitized Investment Link provides life assurance coverage to individuals under universal life policies issued by the company, whereby the benefit are expressed in terms of account value of the policy holder value of which is related to the market value of the underlying assets of the statutory fund.

2.20 Borrowing cost

Interest, mark-up and other charges on long-term finances are capitalized up to the date of commissioning of respective qualifying assets acquired out of the proceeds of such long-term finances. All other interest, mark-up and other charges are recognized in profit and loss account.

2.21 Statutory funds

Subsidiary company

The Company maintains statutory funds in respect of each class of life assurance business in which it operates. Assets, liabilities, revenues and expenses of the subsidiary company are referable to the respective statutory funds. However, where these are not referable to statutory funds, these are allocated to shareholders' fund on the basis of actuarial advice. Apportionment of assets, liabilities, revenues and expenses, whenever required between funds are made on the basis certified by the appointed actuary of the Company. Policyholders' liabilities have been included in statutory funds on the basis of the actuarial valuation carried out by the appointed actuary of the Company on the balance sheet date as required by section 50 of the Insurance Ordinance, 2000.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

| | | <u>110,606</u> | <u>168,207</u> |
| Revenue reserve | | | |
| General reserve | | 936,500 | 936,500 |
| | | <u>1,047,106</u> | <u>1,104,707</u> |

4.1 The reserve for exceptional losses represents the amount set aside by the holding Company in prior years up to 31 December 1978, in order to avail the deduction while computing the taxable income under the old Income Tax Act of 1922. Subsequent to the introduction of repealed Income Tax Ordinance, 1979, which did not permit the said deduction, the company discontinued the setting aside of amounts as reserve for exceptional losses.

4.2 This amount has been set aside by the holding company in prior years for utilization against possible diminution in the value of investments.

4.3 The exchange translation reserve represents the gain resulted from the translation of foreign branches (having business in foreign currencies) of holding company into Pak Rupees. For the purpose of exchange translation reserve, the Dubai and Export Processing Zone branches are treated as foreign branches since these carry on their business in AED and US\$ respectively.

4.4 This represents the share of equity holders of the parent in the capital contribution made by share holders' fund of subsidiary to its statutory funds.

| 6.2 Net of reinsurance | | | | | |
| Actuarial liability relating to future events | 20,034 | 59 | 79,386 | 99,479 | 11,499 |

6.3 Conventional Business

6.3.1 Individual life

Policyholders' liabilities constitute the reserves for basic plans and riders attached to the basic plans.

Policy reserves pertaining to the primary plans are based on Full Preliminary Term - Net Premium method using EFU (61-66) mortality table and a discounting factor interest rate of 3.75%. This table reflects the mortality expectations in Pakistan. In the opinion of a appointed actuary, the table give the closest match to the underlying mortality of the concerned population. This is in line with the requirements under the repealed Insurance Act, 1938 and is considerably lower than the actual investment return the Company is managing on its conventional portfolio. The difference between the above and actual investment return is intended to be available to the Company for meeting administrative expense and provide margins for adverse deviation. Policy reserves for both waiver of premium and accidental death riders have been based on net unearned premiums.

6.3.2 Group life and group credit

Policy reserves for these plans are based on the unearned premium method net of allowances made for acquisition expenses, unexpired reinsurance premium reserve and profit commission. The reserve also comprises allowance for "Incurred But Not Reported" (IBNR) claims in accordance with the advice of the appointed actuary.

6.4 Accident and health business

Policy reserves for this plan have been based on net unearned premiums with allowance for mortality pertaining to accident only.

6.5 Non-unitised investment linked business

Policyholders' liabilities constitute the account value of investment link contracts as well as non-investment reserves of these contracts. Non-investment reserves constitute liability kept to account for risks such as death and non-investment riders (accidental death and disability, monthly income benefit, waiver of premium, etc.). Reserves for death are based on risk charges deducted for, while reserves for the attached riders are based on of net unearned premiums.

| 10.3 | The above represents finance lease entered into with leasing companies for motor vehicles. The liability is payable by October 2014 in quarterly installments and is secured against respective vehicles and security deposits. | |
| 10.4 | Lease payments are bearing variable markup rates include finance charges at KIBOR + 2% to 2.5% per annum. KIBOR is determined on quarterly basis. | |

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

11 CONTINGENCIES AND COMMITMENTS

11.1 Contingencies:

The income tax assessments of the holding company have been finalized up to and including the tax year 2009. However, the holding company has filed appeals in respect of certain assessment years mainly on account of following:

- (i) The Deputy Commissioner of Income Tax (DCIT) has finalized assessments for the assessment year 1999-2000 by taxing capital gains at the full rate of 33%. The aggregate tax liability assessed by the DCIT amounted to Rupees 48.205 million against which the holding company has made a total provision of Rupees 44.141 million resulting in a shortfall of Rupees 4.064 million. The holding company filed appeals with the Commissioner of Income Tax (Appeals) and Income Tax Appellate Tribunal (ITAT) which were decided against the holding company. Consequently the holding company has filed an appeal before the Honorable High Court of Sindh and the petition is fixed for regular hearing;
- ii) The Additional Commissioner / Taxation Officer has reopened assessments for the assessment years 2000-2001 and 2001-2002 by taxing bonus shares received by the holding company during the above mentioned periods resulting in an additional tax liability of Rupees 14.907 million. An appeal was filed before the Commissioner of Income Tax (Appeals) who cancelled the amended order passed by the Additional Commissioner and allowed relief to the holding company but the Tax Department had filed an appeal before the ITAT against the order of the Additional Commissioner, which has been decided in favour of the holding company. However, during the period the holding company received a notice from additional commissioner for reassessment of the case. However, the holding company has filed a constitutional petition in Sindh High Court against such order.
- iii) While finalizing the assessment for the assessment year 2002-2003, DCIT has reduced the business loss for the year by Rupees 88.180 million by adjusting the dividend income against this loss. The holding company maintains that it is entitled to carry the gross loss forward for adjustment against the future taxable income and dividend income for the year should be taxed separately at reduced rate. The appeals of the holding company in this respect have been rejected by the Commissioner of Income Tax (Appeals), the ITAT and the Sindh High Court. The holding company has now filed a reference application with the Supreme Court of Pakistan. The management is confident that the matter will eventually be decided in favor of the holding company and has consequently not made any provision against the additional tax liability of Rupees 26.455 million which may arise in this respect.
- iv) The Tax Authorities have also amended the assessments for tax years 2003 to 2007 on the ground that the holding company has not apportioned management and general administration expenses against capital gain and dividend income. The holding company has filed constitution petition in the High Court of Sindh against the amendment in the assessment order. The holding company may be liable to pay Rupees 5.881 million in the event of decision against the holding company, out of which Rupees 2.727 million has been provided by the holding company resulting in a shortfall of Rupees 3.154 million.
- v) The Taxation Officer has passed an order in the tax year 2005 and 2006 under section 221 of the Income Tax Ordinance, 2001 (the Ordinance) levying minimum tax liability aggregating to Rupees 38.358 million. An appeal had been filed before the Commissioner of Income Tax (Appeals) who upheld the order of the Taxation Officer. The holding company has filed an appeal before ITAT which is pending to be heard.
- vi) The Taxation Officer has passed an order under section 161/205 of the Ordinance in Tax year 2007 creating a demand of Rupees 1.263 million. The holding company filed an appeal before the Commissioner of Income Tax (Appeals) which has been decided against the holding company. The holding company is filing an appeal before the Income Tax Appellate Tribunal.
- vii) During the period the holding company received a notice from additional commissioner Inland Revenue pertaining to the assessment of tax year 2008. Among others, the additional commissioner raised issues pertaining to avoidance of tax on capital gains on listed securities. However, the holding company filed a constitutional petition in Sindh High Court against such order and the court has granted stay in this regard.

Pending resolution of the above-mentioned appeals filed by the holding company, no provision has been made in these consolidated financial statements for the aggregate amount of Rupees 88.201 million (31 December 2009: 88.201 million) as the management is confident that the eventual outcome of the above matters will be in favor of the holding company.

11.2 Commitments:

Holding company

There were no capital or other commitments as at 31 December 2010 (31 December 2009: Nil)

Subsidiary company

Commitments in respect of leased assets - not later than one year is Rupees 2.996 million (31 December 2009: 4.069) and intangible assets not later than one year is Rupees 2.550 million (31 December 2009: Nil).

| Listed equity securities | 14.5 | 853 | 1,615 |
| Government securities | | 55,363 | - |
| | | 56,216 | 1,615 |
| | | 9,607,857 | 9,815,444 |

- 14.1 At 31 December 2010, the fair value of available-for-sale securities was Rupees 10,099.074 million (2009: Rupees 10,154.872 million). As per the group's accounting policy, available-for-sale investments are stated at lower of cost or market value (market value being taken as lower if the reduction is other than temporary). However, International Accounting Standard (IAS) 39, "Financial Instruments: Recognition and Measurements" dealing with the recognition and measurement of financial instruments requires that these instruments should be measured at fair value. Accordingly, had these investments been measured at fair value, their carrying value as at 31 December 2010 would have been higher by Rupees 611.581 million (2009: higher by Rupees 496.835 million).

20.1 Staff Gratuity Fund

The holding company operates an approved funded gratuity scheme for all employees. Actuarial valuation is carried out every year and the latest valuation was carried out as at 31 December 2010.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

The following significant assumptions have been used for valuation of this scheme:

| | Rate per annum |
|---|----------------|
| - Valuation discount rate | 14.25% |
| - Expected rate of increase in salary level | 12.00% |
| - Rate of return on plan assets | 14.25% |

The fair value of the scheme's assets and liabilities for past services of the employees at the latest valuation date are as follows:

| | 31 December 2010 | 31 December 2009 |
|--|----------------------|---------------------|
| | (Rupees in thousand) | |
| Present value of defined benefit obligation at the end of the year | 215,970 | 201,262 |
| Fair value of plan assets at the end of the year | (186,219) | (223,237) |
| | 29,751 | (21,975) |
| Net unrecognized actuarial (losses) / gains | (83,569) | (43,307) |
| Net assets | (53,818) | (65,282) |
| 20.1.1 Amounts recognized in the balance sheet | | |
| Liabilities | - | - |
| Assets | 53,818 | 65,282 |
| Net assets | 53,818 | 65,282 |
| 20.1.2 The amounts charged in profit and loss are as follows: | | |
| Current service cost | 16,301 | 12,797 |
| Interest on obligation | 21,783 | 22,340 |
| Expected return on plan assets | (29,432) | (34,862) |
| Actuarial gains recognized during the year | 2,812 | (1,607) |
| Total gratuity income for the year for funded obligation | 11,464 | (1,332) |
| | 25,687 | 17,762 |

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

30. FINANCIAL AND INSURANCE RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest / mark-up rate risk, price risk and currency risk). The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance. Overall risks arising from the Group's financial assets and liabilities are limited. The Group consistently manages its exposure to financial risk without any material change from previous period in the manner described in notes below. The Board of Directors of the holding company has overall responsibility for the establishment and oversight of Group's risk management framework. The Board is also responsible for developing the Group's risk management policies.

The individual risk wise analysis is given below:

30.1 Credit risk and concentration of credit risk

Credit risk is the risk that arises with the possibility that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The Group attempts to control credit risk by monitoring credit exposures by undertaking transactions with a large number of counterparties in various industries and by continually assessing the credit worthiness of counterparties.

Concentration of credit risk occurs when a number of counterparties have a similar type of business activities. As a result any change in economic, political or other conditions would affect their ability to meet contractual obligations in similar manner. The Group's credit risk exposure is not significantly different from that reflected in the consolidated financial statements. The management monitors and limits the Group's exposure and conservative estimates of provisions for doubtful assets, if any. The management is of the view that it is not exposed to significant concentration of credit risk as its financial assets are adequately diversified in entities of sound financial standing, covering various industrial sectors.

The carrying amount of financial assets represents the maximum credit exposure, as specified below:

| | 31 December 2010 | 31 December 2009 |
|---|--------------------------------|---------------------|
| | —————(Rupees in thousand)————— | |
| Bank deposits | 2,683,112 | 2,111,362 |
| Investments | 9,514,712 | 9,815,444 |
| Premium due but unpaid | 4,554,824 | 3,841,755 |
| Amount due from other insurers / reinsurers | 993,584 | 716,962 |
| Salvage recoveries accrued | 99,636 | 115,753 |
| Loans | 39,754 | 45,769 |
| Accrued investment income | 41,389 | 47,304 |
| Reinsurance recoveries against outstanding claims | 6,253,202 | 1,845,562 |
| Sundry receivable | 240,433 | 112,341 |
| | <u>24,420,646</u> | <u>18,652,252</u> |

General provision is made for receivables according to the Group's policy. The impairment provision is written off when the Group expects that it cannot recover the balance due. During the year receivables of Rupees 87.141 million were further impaired and provided for. The movement in the provision for doubtful debt account is shown in note 15.1 and 16.1.

| | 31 December 2010 | 31 December 2009 |
|---|--------------------------------|---------------------|
| | —————(Rupees in thousand)————— | |
| The age analysis of gross receivables as follows: | | |
| Upto 1 year | 4,019,950 | 3,457,437 |
| 1-2 year | 733,889 | 503,848 |
| | <u>4,753,839</u> | <u>3,961,285</u> |

The credit quality of Group's bank balances can be assessed with reference to external credit ratings as follows:

The credit quality of amount due from other insurers (gross of provision) can be assessed with reference to external credit rating as follows:

| | Amount due from other insurers/reinsurers | Reinsurance recoveries against outstanding claims | 31 December 2010 | 31 December 2009 |
|-----------------------------|---|---|----------------------|------------------|
| | | | (Rupees in thousand) | |
| A or above (including PRCL) | 826,342 | 5,048,642 | 5,874,984 | 2,093,211 |
| BBB | 187,960 | 1,145,093 | 1,333,053 | 474,788 |
| Others | 9,282 | 59,467 | 68,749 | 24,524 |
| Total | 1,023,584 | 6,253,202 | 7,276,786 | 2,592,523 |

Subsidiary company's receivable from reinsurers was Nil as at 31 December 2010. Therefore, the above stated amounts are of Holding company.

30.2 Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of adequate funds through committed credit facilities. The Group finances its operations through equity, borrowings and working capital with a view to maintaining an appropriate mix between various sources of finance to minimize risk. The management follows an effective cash management program to mitigate the liquidity risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

The following are the contractual maturities of financial liabilities, including estimated interest payments on an undiscounted cash flow basis:

| | 31 December 2010 | | | |
|---|----------------------|-----------------------|-------------------|--------------------|
| | Carrying amount | Contractual cash flow | Up to one year | More than one year |
| | (Rupees in thousand) | | | |
| Financial liabilities | | | | |
| Provision for outstanding claims | 7,989,823 | 7,989,823 | 7,989,823 | - |
| Amount due to insurers / reinsurers | 1,599,650 | 1,599,650 | 1,599,650 | - |
| Accrued expenses | 151,051 | 151,051 | 151,051 | - |
| Unclaimed dividend | 29,121 | 29,121 | 29,121 | - |
| Other creditors and accruals | 1,564,460 | 1,564,460 | 1,564,460 | - |
| Liabilities against assets subject to finance lease | 107,637 | 137,609 | 39,312 | 98,297 |
| | 11,441,742 | 11,471,714 | 11,373,417 | 98,297 |
| | 31 December 2009 | | | |
| | Carrying amount | Contractual cash flow | Up to one year | More than one year |
| | (Rupees in thousand) | | | |
| Financial liabilities | | | | |
| Provision for outstanding claims | 3,584,772 | 3,584,772 | 3,584,772 | - |
| Amount due to insurers / reinsurers | 960,748 | 960,748 | 960,748 | - |
| Accrued expenses | 156,626 | 156,626 | 156,626 | - |

| Other creditors and accruals | 1,188,741 | 1,188,741 | 1,188,741 | - |
| Liabilities against assets subject to finance lease | 148,911 | 204,828 | 45,514 | 159,314 |
| | 6,065,763 | 6,121,680 | 5,962,366 | 159,314 |

30.3 Market risk

Market risk means that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The objective is to manage and control market risk exposures within acceptable parameters, while optimizing the return. The market risks associated with the Group's business activities are interest / mark up rate risk, price risk and currency risk.

a) Interest / mark up rate risk

Interest / mark-up rate risk is the risk that value of a financial instrument or future cash flows of a financial instrument will fluctuate due to changes in the market interest/mark-up rates. Sensitivity to interest / markup rate risk arises from mismatching of financial assets and liabilities that mature or repaid in a given period. The Group manages this mismatchment through risk management strategies where significant changes in gap position can be adjusted. At the reporting date the interest markup rate profile of the Group's significant interest / markup bearing financial instruments was as follows:

| | 2010 | 2009 | 2010 | 2009 |
|--|--|------------|------------------|-----------|
| | Effective interest rate (in%) | | Carrying amounts | |
| | (Rupees in thousand) | | | |
| Fixed rate financial instruments | | | | |
| Financial assets | | | | |
| Investments-PIBs and DSCs | 14% to 16% | 14% to 16% | 378,417 | 861,489 |
| Loans | 5% | 5% | 14,407 | 19,504 |
| Floating rate financial instruments | | | | |
| Financial assets | | | | |
| Bank deposits | 2.5%-15% | 2.5%-15% | 2,512,210 | 1,906,421 |
| Investments -TFCs | 9.3%-15.5% | 9.3%-15.5% | 162,661 | 177,772 |
| Financial liabilities | | | | |
| Liabilities against assets subject to finance lease | 3 month KIBOR plus 2 to 2.5 percent | | 107,637 | 148,911 |

Sensitivity analysis

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore a change in interest rate will not effect fair value of any financial instrument. For cash flow sensitivity analysis of variable rate instruments a hypothetical change of 100 basis points in interest rates at the reporting date would have decreased / (increased) profit for the year by the amounts shown below. It is assumed that the changes occur immediately and uniformly to each category of instrument containing interest rate risk. Variations in market interest rates could produce significant changes at the time of early repayments. For these reasons, actual results might differ from those reflected in the details specified below. The analysis assumes that all variables remain constant.

| | Profit and loss 100 bps | |
|---|-------------------------|----------|
| | Increase | Decrease |
| | (Rupees in thousand) | |
| As at 31 December 2010 | | |
| Cash flow sensitivity-variable rate financial liabilities | (1,076) | 1,076 |
| Cash flow sensitivity-variable rate financial assets | 26,749 | (26,749) |
| As at 31 December 2009 | | |
| Cash flow sensitivity-variable rate financial liabilities | 1,489 | (1,489) |
| Cash flow sensitivity-variable rate financial assets | 23,329 | (23,329) |

b) Price risk

Price risk represents the risk that the fair value of a financial instrument will fluctuate because of changes in the market prices (other than those arising from interest / mark up rate risk or currency risk), whether those changes are caused by factor specific to the individual financial instrument or its issuer, or factors affecting all or similar financial instrument traded in the market. The Group is exposed to equity price risk that arises as a result of changes in the levels of KSE-Index and the value of individual shares. The equity price risk exposure arises from the Group's investments in equity securities for which prices in the future are uncertain. The Group policy is to manage price risk through selection of blue chip securities.

The Group's strategy is to hold its strategic equity investments on long term basis. Thus, Group's management is not concerned with short term price fluctuations with respect to its strategic investments provided that the underlying business, economic and management characteristics of the investee remain favorable. The Group strives to maintain above average levels of shareholders' capital to provide a margin of safety against short term equity price volatility. The Group manages price risk by monitoring exposure in quoted equity securities and implementing the strict discipline in internal risk management and investment policies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

The Company has investments in quoted equity securities amounting to Rupees 8,149.756 million (2009: Rupees 7,794.483 million) at the reporting date. The carrying value of investments subject to equity price risk are, in almost all instances, based on quoted market prices as of the reporting date. Market prices are subject to fluctuation which may result from perceived changes in the underlying economic characteristics of the investee, the relative price of alternative investments and general market conditions.

Sensitivity Analysis

Group's investment portfolio has been classified in the available-for-sale and fair value through profit or loss categories, a 10% increase / decrease in redemption value and share prices at year end would have increased/ decreased impairment loss of investment recognized in profit and loss account or in revenue account of both statutory funds of life insurance business as follows:

| | Impact on profit before tax | Impact on equity |
|--|--------------------------------|---------------------|
| | —————(Rupees in thousand)————— | |
| 2010 | | |
| Effect of increase in share price | | |
| Available for sale | 79,988 | 79,988 |
| Through profit or loss | 78 | 78 |
| Effect of decrease in share price | | |
| Available for sale | (104,049) | (104,049) |
| Through profit or loss | (78) | (78) |
| 2009 | | |
| Effect of increase in share price | | |
| Available for sale | 96,282 | 96,282 |
| Through profit or loss | 162 | 162 |
| Effect of decrease in share price | | |
| Available for sale | (763,040) | (763,040) |
| Through profit or loss | (162) | (162) |

c) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's principal transactions are carried out in Pak Rupees and its exposure to foreign exchange risk arises primarily with respect to AED and US\$. Financial assets and liabilities exposed to foreign exchange risk amounted to Rupees 3,929.319 million (2009: Rupees 2,811.675 million) and Rupees 3,011.519 million (2009: Rupees 2,165.203 million) respectively, at the end of the year.

The following significant exchange rates were applied during the year:

| | 2010 | 2009 |
|-----------------------------|------------------|-------|
| | —————Rupees————— | |
| Rupees per US Dollar | | |
| Average rate | 85.16 | 81.72 |
| Reporting date rate | 85.70 | 84.10 |
| Rupees per AED | | |
| Average rate | 23.185 | 22.24 |
| Reporting date rate | 23.33 | 22.9 |

30.4 Insurance risk

30.4.1 Holding Company

The principal risk the holding company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore the objective of the holding company is to ensure that sufficient reserves are available to cover these liabilities. The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements. Further, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims and similar procedures are put in place to reduce the risk exposure of the holding company. The holding company further enforces a policy of actively managing and prompt pursuing of claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the holding company.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts.

Although the holding company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The holding company's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the holding company substantially dependent upon any single reinsurance contract. Reinsurance policies are written with approved reinsurers on either a proportionate basis or non-proportionate basis. The reinsurers, carefully selected and approved, or dispersed over several geographical regions.

Experience shows that larger is the portfolio of similar insurance contracts, smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The holding company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The holding company principally issues the general insurance contracts e.g. marine and aviation, property, motor and general accidents. Risks under non-life insurance policies usually cover twelve month duration. For general insurance contracts the most significant risks arise from accidental fire, atmospheric disaster and terrorist activities. Insurance contracts at times also cover risk for single incidents that expose the holding company to multiple insurance risks.

a) Geographical concentration of insurance risk

To optimize benefits from the principle of average and law of large numbers, geographical spread of risk is of extreme importance. There are a number of parameters which are significant in assessing the accumulation of risks with reference to the geographical location, the most important of which is risk survey.

Risk surveys are carried out on a regular basis for the evaluation of physical hazards associated primarily with the commercial / industrial occupation of the insured. Details regarding the fire separation / segregation with respect to the manufacturing processes, storage, utilities, etc are extracted from the layout plan of the insured facility. Such details are formed part of the reports which are made available to the underwriters / reinsurers for their evaluation. Reference is made to the standard construction specifications laid down by IAP (Insurance Association of Pakistan). For fire and property risk a particular building and neighboring buildings, which could be affected by a single claim incident, are considered as a single location. For earthquake risk, a complete city is classified as a single location. Similarly, for marine risk, multiple risks covered in a single vessel voyage are considered as a single risk while assessing concentration of risk. The holding company evaluates the concentration of exposures to individual and cumulative insurance risks and establishes its reinsurance policy to reduce such exposures to levels acceptable to the holding company.

A risk management solution is implemented to help assess and plan for risk in catastrophic scenarios. It provides a way to better visualize the risk exposure to the holding company determines the appropriate amount of reinsurance coverage to protect the business portfolio.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

b) Reinsurance arrangements

Keeping in view the maximum exposure in respect of key zone aggregates, a number of proportional and non-proportional reinsurance arrangements are in place to protect the net account in case of a major catastrophe. Apart from the adequate event limit which is a multiple of the treaty capacity or the primary recovery from the proportional treaty, any loss over and above the said limit would be recovered from the non-proportional treaty which is very much in line with the risk management philosophy of the holding company.

In compliance of the regulatory requirement, the reinsurance agreements are duly submitted with the Securities and Exchange Commission of Pakistan on an annual basis.

The concentration of risk by type of contracts is summarized below by reference to liabilities:

| | Gross sum insured | | Reinsurance | | Net | |
|---------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| | 2010 | 2009 | 2010 | 2009 | 2010 | 2009 |
| | (Rupees in thousand) | | | | | |
| General Insurance: | | | | | | |
| Fire | 2,420,943,660 | 2,719,659,322 | 1,692,898,065 | 1,787,340,739 | 728,045,595 | 932,318,583 |
| Marine | 1,342,046,500 | 1,079,711,929 | 176,107,263 | 139,707,048 | 1,165,939,237 | 940,004,881 |
| Motor | 70,302,006 | 91,732,566 | 1,074,007 | 1,264,496 | 69,227,999 | 90,468,070 |
| Miscellaneous | 334,429,165 | 237,486,155 | 123,545,771 | 147,311,927 | 210,883,394 | 90,174,228 |
| | 4,167,721,331 | 4,128,589,972 | 1,993,625,106 | 2,075,624,210 | 2,174,096,225 | 2,052,965,762 |

c) Neutral assumptions for claims estimation

The process used to determine the assumptions for calculating the outstanding claim reserve is intended to result in neutral estimates of the most likely or expected outcome. The nature of the business makes it very difficult to predict with certainty the likely outcome of any particular claim and the ultimate cost of notified claims. Each notified claim is assessed on a separate, case by case basis with due regard to claim circumstances, information available from surveyors and historical evidence of the size of similar claims. Case estimates are reviewed regularly and are updated as and when new information is available.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the holding company, in which case information about the claim event is available. IBNR provisions are initially estimated at a gross level and a separate calculation is carried out to estimate the size of the reinsurance recoveries.

The estimation process takes into account the past claims reporting pattern and details of reinsurance programs. The premium liabilities have been determined such that the total premium liability provisions (unearned premium reserve and premium deficiency reserve) would be sufficient to service the future expected claims and expenses likely to occur on the unexpired policies as of reporting date. The expected future liability is determined using estimates and assumptions based on the experience during the expired period of the contracts and expectations of future events that are believed to be reasonable.

d) Sensitivity Analysis

The risks associated with the insurance contracts are complex and subject to a number of variables which complicate quantitative sensitivity analysis. The holding company considers that the liability for insurance claims recognized in the balance sheet is adequate. However, actual experience may differ from the expected outcome.

As the holding company enters into short term insurance contracts, it does not assume any significant impact of changes in market conditions on unexpired risks. However, some results of sensitivity testing are set out below, showing the impact on profit before tax net of reinsurance.

| | Revenue account | | Pre tax profit | | Share holders' equity | |
|-----------------------------|-----------------|--------------|------------------|------------------|-----------------------|------------------|
| | 2010 | 2009 | 2010 | 2009 | 2010 | 2009 |

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

30.4.2 Subsidiary Company

30.4.2.1 Conventional business

a) Individual Life

The risk underwritten is mainly death and sometimes disability. The risk of death and disability will vary in degree by age, gender, occupation, income group and geographical location of the assured person. The subsidiary company's exposure to poor risks may lead to unexpectedly high severity and frequency in claims' experience. This can be a result of anti-selection, fraudulent claims, a catastrophe or poor persistency. The subsidiary company may also face the risk of poor investment return, inflation of business expenses and liquidity issues on amount invested in the fund. The subsidiary company faces the risk of under-pricing particularly due to the fact that majority of these contracts are long term. Additionally, the risk of poor persistency may result in the subsidiary company being unable to recover expenses incurred at policy acquisition.

The subsidiary company manages these risks through its underwriting, reinsurance, claims handling policy and other related controls. The subsidiary company has a well defined medical underwriting policy and avoids selling policies to high risk individuals. This puts a check on anti-selection. Profit testing is conducted on an annual basis to ensure reasonableness of premiums charged. Reinsurance contracts have been purchased by the subsidiary company to limit the maximum exposure on any one insured person. The subsidiary company is developing and intends to eventually have a good spread of business throughout the country thereby ensuring diversification of geographical risks. To avoid poor persistency the subsidiary company applies quality controls on the standard of service provided to policyholders and has placed checks to control mis-selling and to track improvements in the standard of service provided to policyholders. For this, a regular monitoring of lapsation rates is conducted. On the claims handling side, the subsidiary company has procedures in place to ensure that payment of any fraudulent claims is avoided. For this, the Manager Claims and Head of Operations reviews all claims (within variable materiality limits) for verification, and a specific and detailed investigation of all apparently doubtful claims (particularly of high amounts) is conducted. Further all payments on account of claims are made after necessary approval of the Chief Executive Officer of the subsidiary company. The subsidiary company maintains adequate liquidity in its fund to cater for a potentially sudden and high cash requirement.

i) Frequency and severity of claims

The subsidiary company measures concentration of risk in terms of exposure by geographical area. Concentration of risk is not currently a factor of concern as the business is developing and aims to achieve a spread of risks across various parts of the country.

There is some concentration by sum assured amounts which may have an impact on the severity of benefit payments on a portfolio basis.

The table below presents the concentration of assured benefits across five bands of assured benefits per individual life assured. The benefit assured figures are shown gross and net of the reinsurance contracts described above.

The amounts presented are showing total exposure of the subsidiary company including exposure in respect of riders attached to the main policies.

| Benefits assured per life | Sum assured at the end of 2010 | | | |
|---------------------------|--------------------------------|------|----------------------|------|
| | Total benefits assured | | | |
| | Before reinsurance | | After reinsurance | |
| Rupees | (Rupees in thousand) | % | (Rupees in thousand) | % |
| 0-200,000 | 7,867 | 2.4 | 2,360 | 3.0 |
| 200,000 - 400,000 | 33,471 | 10.2 | 10,040 | 12.6 |
| 400,001 - 800,000 | 82,257 | 25.0 | 24,677 | 31.0 |
| 800,001 - 1,000,000 | 7,671 | 2.3 | 2,016 | 2.5 |
| More than 1,000,000 | 197,465 | 60.1 | 40,449 | 50.9 |
| Total | 328,731 | | 79,542 | |

ii) Sources of uncertainty in the estimation of future benefit payments and premium receipts

Uncertainty in the estimation of future benefit payments and premium receipts for long-term conventional assurance contracts arises from the unpredictability of long-term changes in overall levels of mortality and morbidity incidence rates.

The subsidiary company assumes the expected mortality to vary between 60% and 100% of EFU (61-66) since the current experience for this line of business is not credible. Morbidity incidence rates are taken as a percentage of reinsurer's risk premium rate.

iii) Process used to decide on assumptions

For long-term conventional assurance contracts, long-term assumptions are made at the inception of the contract. Keeping the statutory minimum reserving basis in view, the subsidiary company determines assumptions on future mortality, morbidity, persistency, administrative expenses and investment returns. At regular intervals, profit testing is conducted on main policies. Assumptions used for profit testing of the main policies are as follows:

The expected mortality is assumed to vary between 60% and 100% of EFU (61-66) since the current experience for this line of business is not credible.

Morbidity incidence rates for morbidity are taken as a percentage of reinsurer's risk premium rate.

Persistency: Since the subsidiary company has recently started business, it has no own experience to which it refer. Industry standards for anticipated persistency rates have been used initially. Eventually, a periodic analysis of the subsidiary company's recent and historic experience will be performed and persistency will be calculated by applying statistical methods. Persistency rates vary by products and more importantly the sales distribution channel. An allowance will then made for any trend in the data to arrive at best estimate of future persistency rates for each sales distribution channel.

Expense levels and inflation: As the business is new, estimates from business projections have been used. Once established, a periodic study will be conducted on the subsidiary company's current business expenses and future projections to calculate per policy expenses. Expense inflation is assumed in line with assumed investment return.

Investment returns: The investment returns are based on the historic performance of the assets and asset types underlying the fund.

iv) Changes in assumptions

There has been no change in assumptions.

v) Sensitivity analysis

After reinsurance, the overall liability for individual life conventional business stands at less than 4% of the total policyholder liability held in respect of individual life business. Due to its immateriality, sensitivity analysis has not been conducted.

b) Group Life

The main risk written by the subsidiary company is mortality. The subsidiary company may be exposed to the risk of unexpected claim severity or frequency. This can be a result of writing business with higher than expected mortality (such as mining or other hazardous industries), writing high cover amounts without adequate underwriting, difficulty of verification of claims, fraudulent claims or a catastrophe. The subsidiary company also faces risk such as that of under-pricing to acquire business in a competitive environment and of non-receipt of premium in due time. There also exists a potential risk of asset liability term mismatch due to liabilities being very short term in nature.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

The subsidiary company manages these risks through underwriting, reinsurance, effective claims handling and other related controls. The subsidiary company has a well defined medical under-writing policy and avoids writing business for groups with overly hazardous exposure. Pricing is done in line with the actual experience of the subsidiary company. The premium charged takes into account the actual experience of the client and the nature of mortality exposure the group faces. The rates are certified by the appointed actuary for large groups having a group assurance policy with annual premium of Rs 1 million or above in accordance with the requirements of Circular 9 of 2005 dated August 1, 2005. The subsidiary company also maintains a Management Information System (MIS) to track the adequacy of the premium charged. Reinsurance contracts have been purchased by the subsidiary company to limit the maximum exposure to any one life. At the same time, due caution is applied in writing business in areas of high probability of terrorism. The subsidiary company ensures writing business with good geographical spread and tries to maintain a controlled exposure to large groups which generally have poor experience. Writing business of known hazardous groups is also avoided. On the claims handling side, the subsidiary company ensures that payment of any fraudulent claims is avoided. For this, Manager Claims and Head of Operations reviews all large claims for verification. Strict monitoring is in place at the Board of Directors level in order to keep the outstanding balances of premium at a minimum, especially the ones that are due for more than 90 days. The bulk of the assets held against liabilities of this line of business are cash to money market with short durations and high liquidity, thus mitigating the risk of asset value deterioration and liability mismatch.

i) Frequency and severity of claims

The subsidiary company measures concentration of risk in terms of exposure by geographical area. Concentration of risk arising from geographical area is not a factor of concern as the subsidiary company aims to achieve a spread of risks across various parts of the country.

The following table presents the concentration of assured benefits across five bands of assured benefits per individual life assured. The benefit assured figures are shown gross and net of the reinsurance contracts described above.

The amounts presented are showing total exposure of the subsidiary company including exposure in respect of riders attached to the main policies.

| Benefits assured per life | Sum assured at the end of 2010 | | | |
|---------------------------|--------------------------------|-------|----------------------|-------|
| | Total benefits assured | | | |
| | Before reinsurance | | After reinsurance | |
| Rupees | (Rupees in thousand) | % | (Rupees in thousand) | % |
| 0-200,000 | - | | - | |
| 200,000 - 400,000 | 37,500 | 0.03 | 26,250 | 0.08 |
| 400,001 - 800,000 | 103,500 | 0.08 | 51,750 | 0.15 |
| 800,001 - 1,000,000 | - | 0.00 | - | 0.00 |
| More than 1,000,000 | 123,088,742 | 99.89 | 33,417,042 | 99.77 |
| Total | <u>123,229,742</u> | | <u>33,495,042</u> | |

ii) Sources of uncertainty in the estimation of future benefit payments and premium receipts

Other than conducting a liability adequacy for Unexpired Risk Reserves (URR), there is no need to estimate mortality for future years because of the short duration of the contracts.

iii) Process used to decide on assumptions

The business is too new for any meaningful investigation into group's past experience. However industry experience, the insured group's own past experience and reinsurer risk rates are used to determine the expected level of risk in relation to the EFU (61-66) table.

iv) Changes in assumptions

There has been no change in assumptions.

v) Sensitivity analysis

After reinsurance, the net unearned premium reserve for this business stands at less than 10% of the total policyholder liability. This liability will be on the subsidiary company's books for under a year. Due to its immateriality, a sensitivity analysis has not been conducted.

30.4.2.2 Accident & Health

The main risk written by the subsidiary company is hospitalisation and death by accidental means. The subsidiary company may be exposed to the risk of unexpected claim frequency. This can be a result of high exposure in a particular geographical area, fraudulent claims and catastrophic event.

The subsidiary company manages these risks through its underwriting, reinsurance and claims handling policy. On the claims handling side, the subsidiary company ensures that payment of any fraudulent claims is avoided.

i) Frequency and severity of claims

Currently, only one product is being sold in this segment effectively which offers a fixed sum assured on hospitalisation or death due to accident. The subsidiary company therefore has a limited exposure to claim severity. Since this product is marketed on an individual basis, the risk of unexpected high frequency in claims due to accumulation is also expected to be low.

The table below presents the concentration of assured benefits across five bands of insured benefits per individual life assured.

The amounts presented are showing total exposure of the subsidiary company including exposure in respect of riders attached to the main policies.

| Benefits assured per life | Sum assured at the end of 2010 | | | |
|---------------------------|--------------------------------|------|----------------------|------|
| | Total benefits assured | | | |
| | Before reinsurance | | After reinsurance | |
| Rupees | (Rupees in thousand) | % | (Rupees in thousand) | % |
| 0-200,000 | - | - | - | - |
| 200,000 - 400,000 | 14,746 | 78.5 | 4,424 | 78.5 |
| 400,001 - 800,000 | 3,030 | 16.1 | 909 | 16.1 |
| 800,001 - 1,000,000 | - | - | - | - |
| More than 1,000,000 | 1,010 | 5.4 | 303 | 5.4 |
| Total | <u>18,786</u> | | <u>5,636</u> | |

ii) Sources of uncertainty in the estimation of future benefit payments and premium receipts

Other than the hazard of fraudulent claims, there is no need to estimate accident rates for future years because of the short duration of the product offered under this business.

iii) Process used to decide on assumptions

Experience data is not sufficient to be statistically credible, so industry and reinsurer data has been used to fix assumptions.

iv) Changes in assumptions

There has been no change in assumptions.

v) Sensitivity analysis

The net unearned premium reserve for this business stands at less than 0.1% of the total (net of reinsurance) policyholder liability. This liability will be on the subsidiary company's books for under a year. Due to its immateriality, a sensitivity analysis has not been conducted.

30.4.2.3 Non Unitised Investment Linked Business

The risk underwritten is mainly death and sometimes disability. The risk of death and disability will vary in degree by age, gender, occupation, income group and geographical location of the assured person. The subsidiary company's exposure to poor risks may lead to unexpectedly high severity and frequency in claims' experience. This can be a result of anti-selection, fraudulent claims, a catastrophe or poor persistency. The subsidiary company may also face the risk of inflation of business expenses and liquidity issues on amount invested in the fund. The subsidiary company faces the risk of under-pricing particularly due to the fact that these contracts are long term. Additionally, the risk of poor persistency may result in the subsidiary company being unable to recover expenses incurred at policy acquisition.

The subsidiary company manages these risks through its underwriting, reinsurance, claims handling policy and other related controls. The subsidiary company has a well defined medical underwriting policy and avoids selling policies to high risk individuals. This puts a check on anti-selection. Profit testing is conducted on an annual basis to ensure reasonableness of premiums charged. Reinsurance contracts have been purchased by the subsidiary company to limit the maximum exposure on any one insured person. The subsidiary company is developing and intends to eventually have a good spread of business throughout the country thereby ensuring diversification of geographical risks. To avoid poor persistency the subsidiary company applies quality controls on the standard of service provided to policyholders and has placed checks to control mis-selling and to track improvements in the standard of service provided to policyholders. For this, a regular monitoring of lapsation rates is conducted. On the claims handling side, the subsidiary company has procedures in place to ensure that payment of any fraudulent claims is avoided. For this, the Manager Claims and Head of Operations reviews all claims (within variable materiality limits) for verification, and a specific and detailed investigation of all apparently doubtful claims (particularly of high amounts) is conducted. The subsidiary company maintains adequate liquidity in its fund to cater for a potentially sudden and high cash requirement. Further all payments on account of claims are made after necessary approval of Chief Executive Officer of the subsidiary company. The subsidiary company reserves the right to review the charges deductible under the contracts, thus limiting the risk of under pricing.

i) Frequency and severity of claims

The subsidiary company measures concentration of risk by geographical area. Concentration of risk is not currently a factor of concern as the business is developing and aims to achieve a spread of risks across various parts of the country.

There is some concentration by sum assured amounts which may have an impact on the severity of benefit payments on a portfolio basis.

The subsidiary company charges for mortality risk on a monthly basis for all insurance contracts. It has the right to alter these charges based on its mortality experience and hence minimises its exposure to mortality risk. Delays in implementing increases in charges and market or regulatory restraints over the extent of the increases may reduce its mitigating effect. The subsidiary company manages these risks through its underwriting strategy and reinsurance arrangements.

The table below presents the concentration of assured benefits across five bands of assured benefits per individual life assured. The benefit assured figures are shown gross and net of the reinsurance contracts described above. The amounts presented are showing total exposure of the subsidiary company including exposure in respect of riders attached to the main policies.

| Benefits assured per life | Sum assured at the end of 2010 | | | |
|---------------------------|--------------------------------|------|----------------------|------|
| | Total benefits assured | | | |
| | Before reinsurance | | After reinsurance | |
| Rupees | (Rupees in thousand) | % | (Rupees in thousand) | % |
| 0-200,000 | 132,070 | 6.2 | 38,269 | 7.8 |
| 200,000 - 400,000 | 147,791 | 6.9 | 41,842 | 8.5 |
| 400,001 - 800,000 | 413,647 | 19.4 | 118,409 | 24.1 |
| 800,001 - 1,000,000 | 637,992 | 29.9 | 186,448 | 38.0 |
| More than 1,000,000 | 803,152 | 37.6 | 106,200 | 21.6 |
| Total | <u>2,134,652</u> | | <u>491,168</u> | |

ii) Sources of uncertainty in the estimation of future benefit payments and premium receipts

Uncertainty in the estimation of future benefit payments and premium receipts for long-term Non-unitised Investment Link assurance contracts arises from the unpredictability of long-term changes in overall levels of mortality and morbidity of the insured population and variability in policyholders' behaviour.

Factors impacting future benefit payments and premium receipts are as follows:

Mortality: The subsidiary company assumes the expected mortality to vary between 60% and 100% of EFU (61-66) since the current experience for this line of business is not credible.

Morbidity: Incidence rates for morbidity are taken as a proportion of reinsurer's risk rates.

Persistency: The business is developing and actual first year persistency rates will only be measurable next year. Eventually the subsidiary company intends to conduct periodic analyses on its historic book of business, using statistical methods to determine its persistency experience. Persistency rates are expected to vary by product and more importantly the sales distribution channel. Allowance will then be made for any trend in the data to arrive at best estimates of future persistency rates for each sales distribution channel.

iii) Process used to decide on assumptions

For long-term Non-unitised Investment Link assurance contracts, assumptions are made in two stages. At inception of the contract, the subsidiary company determines assumptions on future mortality, morbidity, persistency, administrative expenses and investment returns. At regular intervals, profit testing is conducted on main policies. Assumptions used for profit testing of the main policies are as follows:

Mortality: The expected mortality is assumed to vary between 60% and 100% of EFU (61-66) since the current experience for this line of business is not credible.

Morbidity: Incidence rates for morbidity are taken as a proportion of reinsurer's risk rates.

Persistency: Since the subsidiary company has recently started business, it has no own experience to which it refer. Industry standards for anticipated persistency rates have been used initially. Eventually, a periodic analysis of the subsidiary company's recent and historic experience will be performed and persistency will be calculated by applying statistical methods. Persistency rates vary by products and more importantly the sales distribution channel. An allowance will then made for any trend in the data to arrive at best estimate of future persistency rates for each sales distribution channel.

Expense levels and inflation: As the business is new, estimates from business projections have been used. Once established, a periodic study will be conducted on the subsidiary company's current business expenses and future projections to calculate per policy expenses. Expense inflation is assumed in line with assumed investment return.

Investment returns: The investment returns are based on the historic performance of the assets and asset types underlying the fund.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

iv) Changes in assumptions

The subsidiary company has launched Non-unitised Investment Link Business during the current year as a result changes in assumptions does not apply.

v) Sensitivity analysis

The subsidiary company has recently commenced operations and sensitivity tests were carried out at the time of pricing products to try and ensure robust pricing. Periodic sensitivity analyses of the subsidiary company's in-force business determine whether any reserve needs to be created or product prices for new business need to be revised in light of changing or anticipated changes in experience from that expected when pricing the existing book of business. The current nature, volume and age of in-force business does not require a detailed sensitivity analysis at this stage.

31. FAIR VALUES OF FINANCIAL ASSETS AND LIABILITIES

The carrying values of all financial assets and liabilities reflected in these consolidated financial statements approximate to their fair values except for available-for-sale investments which are stated at lower of cost and market value in accordance with the requirements of the SEC (Insurance) Rules, 2002. The carrying and fair value of these investments have been disclosed in note 14 to the financial statements. There were no financial instruments as at the reporting date aggregately measured and stated at fair value subsequent to initial recognition. Therefore, analysis under following groups from levels 1 to 3 based on the degree to which fair value is observable cannot be produced:

Level 1: Quoted market prices

Level 2: Valuation techniques (market observable)

Level 3: Valuation techniques (non market observable)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2010

33. NON-ADJUSTING EVENTS AFTER THE BALANCE SHEET DATE

The Board of Directors of the holding Company in their meeting held on 22 March 2011 proposed a final cash dividend for the year ended 31 December 2010 @ 15% i.e Rupees 1.5/- per share (2009: @ 15% i.e Rupees 1.5/- per share). This is in addition to the interim dividend @ 10% i.e Rupee 1.0/- per share (2009: @ 15% i.e Rupees 1.5/- per share) resulting in a total dividend for the year ended 31 December 2010 of Rupees 2.5/- per share (2009: Rupees 3/- per share). For the year ended 31 December 2010 bonus shares issued were Nil (2009: @ 10%). The approval of the members of holding company for the cash dividend will be obtained at the forthcoming Annual General Meeting. The consolidated financial statements for the year ended 31 December 2010 do not include the effect of these appropriations which will be accounted for in the financial statements for the year ending 31 December 2011.

34. CAPITAL RISK MANAGEMENT

The Group's goals and objectives when managing capital are:

- to be an appropriately capitalized institution in compliance with the paid-up capital requirement set by the SECP. Minimum paid-up capital requirement for non-life insurers is raised to Rupees 300 million. while for life insurance it is raised to Rupees 500 million. The Group is well in excess of the limit prescribed by the SECP and is also complying other solvency requirements prescribed by SECP;
 - to safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for the other stakeholders;
 - to provide an adequate return to shareholders by pricing insurance contracts and policies commensurately with the level of risk;
- maintain strong ratings and to protect the company against unexpected events/ losses; and
- to ensure a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

35. NUMBER OF EMPLOYEES AT 31 DECEMBER

NOTES

1. A member entitled to attend and vote at the Annual General Meeting is entitled to appoint another member as a proxy to attend and vote instead of him/her. A corporation or a company being a member of the Company may appoint any of its officers, though not a member of the Company.
2. Proxies must be received at the Office of our Registrar M/s Technology Trade (Pvt) Ltd., Dagia House, 241-C, Block 2, P.E.C.H.S., Off: Shahrah-e-Quaideen, Karachi not less than 48 hours before the time appointed for the Meeting.
3. The signature on the instrument of proxy must conform to the specimen signature recorded with the Company.
4. CDC Account Holders will further have to follow the under-mentioned guidelines as laid down in Circular 1 dated January 26, 2000 issued by the Securities and Exchange Commission of Pakistan.

A. For attending the Meeting

- i) In case of individuals, the account holder or sub-account holder, shall authenticate his/her identity by showing his/her original National Identity Card or original Passport at the time of attending the Meeting.
- ii) In case of corporate entity, the Board of Directors' resolution / power of attorney with specimen signature of the nominee shall be produced (unless it has been provided earlier) at the time of the Meeting.

B. For appointing Proxies

- i) In case of individuals, the account holder or sub-account holder, shall submit the proxy form as per the above requirement.
- ii) The proxy form shall be witnessed by two persons whose names, addresses and NIC numbers shall be mentioned on the form.
- iii) Attested copies of NIC or the passport of the beneficial owners and of the proxy shall be furnished with the proxy form.
- iv) The proxy shall produce his/her original NIC or original passport at the time of the Meeting.
- v) In case of corporate entity, the Board of Directors' resolution / power of attorney with specimen signatures shall be submitted (unless it has been provided earlier) along with proxy form to the Company.
