FOREWORD

Ministry of National Food Security and Research has been constituted vide Cabinet Division's Notifications No. 4-14/2011-Min.1, dated 26th October, 2011 and dated 27th October, 2011. The new Ministry has been assigned twenty-one (21) functions under Rules of Business vide Cabinet Division's Notification S.R.O. 1088(I)/2011 dated 9th December, 2011. One of the functions is Collection of statistics regarding production, consumption, prices, imports and exports of food grains. Ministry of National Food Security & Research has the mandate to achieve the foremost goal of national food security endeavoring through incessant research and improved national policies. Maintaining the necessary statistics pertaining to food and agriculture sector is the principal objective in the direction to achieve this national goal that greatly helps to researchers, academia and policy makers. Research is a continuous process and the availability of reliable data is a pre-requisite to get logical research results and paving the way for concrete policy decisions.

The M/o National Food Security and Research since its creation is presenting this publication first time. It is a part of concerted efforts to provide concrete basis for research. The best feature of this annual publication is its comprehensiveness that it provides all sorts of data relating to agricultural sector of the country up to June, 2012 which includes area, production and yield of crops. The data for the earlier period commencing from 1994-95 through 2011-12 has also been provided for supporting time series analysis. It contains province-wise, crop-wise and other statistical data pertaining to agriculture sector.

I wish to commend the Economic Consultant and his team for preparing this imperative publication which will serve as a source of invaluable reference for all stakeholders pertaining to food and agriculture sector. The information contained in this book can be useful in designing growth models, plans and strategies for the development of agriculture sector to achieve the key objective of accelerating the pace of economic development.

Any suggestion for further improving the scope of this publication will be highly appreciated.

(Taimur Azmat Osman)
Secretary

INTRODUCTION

The Ministry of National Food Security and Research (NFS&R) is assigned the function regarding collection of statistics regarding production, consumption, prices, imports and exports of food grains. Prior to the devolution, this function was being performed by Ministry of Food and Agriculture. This function has the objectives to provide the agricultural statistics for policy formulation, planning and research. The Economic Wing Ministry of NFS&R is carrying out this activity and thus the present publication captioned as “Agricultural Statistics of Pakistan 2011-12” is being produced first time by the M/o NFS&R.

Agriculture is the backbone of Pakistan’s economy and is an inevitable and integral part to ensure Food Security in the country. About 68% of the population is engaged in farming directly or indirectly through production, processing and distribution of major agricultural commodities. Agriculture contributes about 21 percent of our Gross Domestic Product (GDP), provides livelihood to about 68 percent people living in rural areas and employs about 45 percent of the total national labour force. The agriculture sector is the major contributor in the overall export earnings of Pakistan. The share of food group alone in the total export of Pakistan for the year 2011-12 stood at 17.5 percent. Agriculture is equally important for industrial development. Out of about 5000 industrial establishments in Pakistan, about 60 percent are agro-based.

This publication of Agricultural Statistics of Pakistan is aimed to provide area, production and also per hectare yield data about major and minor crops. The data is for the period from 1993-94 to 2011-12 to facilitate year-to-year comparison and analysis. Variety-wise data of major crops i.e. wheat, cotton and rice is provided, while data of other crops are without any varietal differentiation. The data relating to fruit such as citrus, mangoes etc. and major condiments/vegetables such as onions and potatoes etc. has also been added.

It also consists of land use statistics which includes details of irrigated, non-irrigated areas, farm size etc. The data about agricultural inputs i.e. improved seeds, fertilizers, water, pesticides, rainfall data and details of area covered by plant protection etc are given. The data relating to disbursement of agricultural credit by Commercial Banks, ZTBL, PPCBL and domestic private banks is also documented in this publication. The data also pertaining to agricultural machinery, lift pumps, tube wells and tractors according to horsepower, farm size as well as private/public ownership etc. Being integral part of agricultural system the publication is

consisting of data on livestock population in the country alongwith estimated production of milk, meat, eggs and other livestock products etc. It also provides data about inland and marine fish production and details of fishing crafts. Part of the publication also provides information about forestry, rangeland, major forest products and value addition of various forestry products etc. The publication also covers trade statistics relating to major exports and imports of agricultural commodities. In addition, it provides details of procurement/support and intervention prices as well as wholesale prices of various important crops such as wheat, cotton, sugarcane and maize besides rates of diesel, electricity & petroleum products etc. The data provided on per capita availability of cereals, edible oils, meat, fish and milk alongwith estimates of GDP etc. add value to this publication.

It is important to mention that the crops data is collected through acreage surveys as well as sample village surveys by the enumerators who fill up a number of prescribed Performa's and submit to Provincial Crop Reporting Services. The accuracy of estimates is further cross checked and verified by joint inspection teams of Revenue and Extension Departments of Provincial Governments. These crops estimates are supplied to the PBS for compilation at Federal level. The estimates are submitted in three stages i.e. first, second and final estimates for the major crops. Reasons for increase/decrease in the production of major crops have been included to facilitate the data analyst. A summary table about area, production and yield of agricultural commodities has also been added in the publication for the years 2010-11 and 2011-12.

The Government policy is to ensure food security through sustainable agricultural development and balanced growth of food sector to meet population needs and also to generate agricultural surplus to enhance the export of agricultural sector, which would eventually lead to enhance the country's growth performance. It is only possible, if reliable data is available which the primary objective of this publication is. The timely and prompt cooperation extended by all the concerned departments and organizations at federal and provincial level is well acknowledged with gratitude.

The publication is also available at M/o NFS&R's website www.mnfsr.gov.pk. Economic Wing M/o NFS&R may be contacted for any additional information and also to suggest improvements in future endeavors.

(Dr. Muhammad Aslam)
Economic Consultant

=====

SOURCE OF CROPS DATA
AREA, PRODUCTION AND YIELD PER HECTARE

The area and production data in the following tables is based on the crops estimates supplied by the Crop Reporting Services of Provinces and compiled by the Ministry of National Food Security and Research (Economic Wing). Rounding of figures may result in slight difference.

Area below 50 hectares is denoted with symbol “a”

Production below 50 tonnes with symbol “b”

=====

Table 1

Food Crops = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash Crops = Sugarcane, Cotton, Tobacco, Jute, Sugarbeet, Guarseed & Sunhemp

Pulses = Gram, Mung, Masoor, Mash, Mattar, Other Kharif & Other Rabi Pulses.

Edible Oilseeds = R&M Seed, Sesamum, Groundnut, Soybean, Sunflower, Safflower,
(Production includes Cotton Seed as well).

2011-12	2736	3585	1550	2170	2714

N.B: Area of wheat crop for the year 2011-12 shows a decrease of 2.82% over the previous year. Area decreased due to problems faced by the farmers in disposal of wheat produced last year, shifting of area to BT cotton crops in irrigated tract, late crushing by sugarmills and considerable increase in Potato (Autumn) and Maiz (Spring) crops. Production shows a decrease of 6.90% over the last year, which is attributed to correspondence decrease in area, less use of fertilizer, shortage of rainfall, less canal withdrawal, acute load shedding and attack of aphid caused low yield.

N.B: Area and production of Rice crop for the year 2011-12 show an increase of 8.7 percent and 27.7 percent respectively, over previous year. Increase in area over last year, is due to heavy rains particularly in lower Sindh more area under Crop was damaged in 2010-11 but during current year more area is reported under the crop and better market rates their produce the grower brought more area under crop. While Production of Rice crop increase due to corresponding increase in area, this year more area under Hybrid rice reported under cultivation and recommended dose of inputs.

2011-12	5699	1160	1868	1054	3990

N.B:

Area of Maiz Crop for the year 2011-12 shows an increase of 11.6 percent over the previous year, which is due to better returns received by the growers from last year Crop. The Production shows an increase of 17.0 percent over the previous year, which is due to corresponding increase in area, favourable weather conditions and more area converted by Hybrid varieties.

N.B: Area of Sugarcane Crop for the year 2011-12 shows an increase of 7.1% as compared to 2010-11. Area increased due to lucrative price of last year produce received by the growers which encouraged to put more area under Sugarcane in Punjab. The Production shows an increase of 5.6% over the previous year, which is due to intermittent rain during growth session and corresponding increase in area.

N.B:-The area of cotton crop for the year 2011-12 shows an increase of 5.4% over the previous year which is due to Lucrative market rates of last year induced the grower, and also receiving seed on subsidiezed rate encourage the growers to put more area under Cotton Crops.While increase in production is due to corresponding increase in area, favourable weather condition, less attack of CLCV/pest,better managemant and early sown of BT cotton.

* = Nominal.

R = Repeated of last year.

Source:- Provincial Agriculture Departments.

GEOGRAPHICAL AREA is that area which has been surveyed and calculated by the Survey of Pakistan.TOTAL AREA REPORTED is the total physical area of the village/deh, tehsil or district etc.FOREST AREA is the area of any land classed or administered as forest under any legal enactment dealing with forests. Any cultivated area which may exist within such forest should be excluded (and shown under heading cultivated area).AREA NOT AVAILABLE FOR CULTIVATION is that uncultivated area of the farm which is under farm home-steads, farm roads and other connected purposes and therefore not available for cultivation.CULTURABLE WASTE is that uncultivated farm area which is fit for cultivation but was not cropped during the year under reference nor in the year before that.CULTIVATED AREA is that area which was sown at least during the year under reference or during the previous year. Cultivated Area = Net Area sown + Current FallowCURRENT FALLOW is that area which is vacant during the year under reference but was sown at least once during the previous year.NET AREA SOWN is that area which is sown at least once during (Kharif & Rabi) the year under reference.AREA SOWN MORE THAN ONCE is the difference between the total cropped area and the net area sown.TOTAL CROPPED AREA means the aggregate area of crops raised in a farm during the year under reference including the area under fruit trees.

N.B. Vegetables include Potatoes.

Food Crops = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash crops = Sugarcane, Cotton, Tobacco, S.beet, Jute and Guarseed

Pulses = Gram, Mung, Mash, Masoor, Mattar, Other Kharif and Rabi Pulses.

Oilseeds = Rapeseed & Mustard, Sesamum, Groundnut, Linseed, Castorseed and other oilseeds.

Condiments = Chillies, Onion, Garlic, Coriander. Turmeric and Ginger
