A glimpse of field works

Mian Misbah-ur-Rehman (Chairman)

The Board of Directors is pleased to present the 49th Annual Report and the Audited Financial Statements of your Company for the Financial Year ended June 30, 2012 along with the Auditors Report thereon.

Energy Overview

Pakistan has been suffering from an energy crisis for about half a decade now. The Country's energy crisis has increased the demand of indigenous natural gas, being the least expensive fuel. Increasing demand against depleting resources has lead to gas load management, in order to supply gas to all sectors. The year 2011-12 has been a challenging year for SNGPL yet again, wherein the Management and the Board were successfully able to protect the Company's and the shareholder's interest. The same was also made possible through prudent decision making, prompt actions and effective team work, which led to successful and profitable operations of the Company.

During the year, your Company faced two thorny issues i) increasing demand of natural gas against depleting reservoirs resulting in an imbalance between the demand and supply position ii) Unaccounted-for-Gas (UFG)

losses. The increasing size of the Company's distribution network, wide difference between local gas prices and alternative fuels, increasing gap between demand and supply, theft of gas by consumers / non-consumers, overhead / underground leakages, third party damages, shift of bulk sale to retail sale and measurement errors were major factors that contributed to the increase in the menace of UFG loss. Despite all odds and due to unstinting efforts, your Company has been able to arrest the increase and reduce the UFG loss by more than 1% during the year viz from 11.21% in 2010-11 to 10.20% in FY 2011-12.

Natural gas is a leading resource to meet the Country's energy consumption demands. As per Pakistan Energy Year Book 2011, the share of natural gas in primary fuel supplies during 2010-11 was 47.60%. Natural gas being a relatively inexpensive fuel is used inefficiently, thereby deepening the energy crisis. However, keeping

Mohammad Arif Hameed (Managing Director / Chief Executive Officer)

the Nation's interest prime, your Company has launched effective gas conservancy campaigns via different mediums. These campaigns have created an awareness to conserve gas to a certain extent, however a great deal of effort is required to change the mind set of the public at large.

Financial Review

Your Company has graciously been able to earn Rs. 7,230 million gross profit, Rs. 3,044 million net profit and an earnings per share of Rs. 5.28. Your Directors are pleased to announce a cash dividend @ 25% i.e Rs. 2.50 per share and bonus shares in the proportion of 1 share for every 10 shares held i.e.10 %.

The summary of financial highlights is given below:-

	(Rs. in "000")
Profit before taxation	4,740,885
Provision for taxation	1,696,889
Profit after taxation	3,043,996
Adding thereto:	
Un-appropriated profit brought forward	7,806,496
Profit available for appropriation	10,850,492
Appropriations	
Cash Dividend @ 25% i.e. Re 2.50 per share	e (1,441,402)
(Ordinary shares in issue Nos. 576,560,605 held)	
Bonus shares in the proportion of 1 share	for
every 10 shares held i.e. 10%	(576,561)
Un-appropriated profit	8,832,529

The Company operates under a fixed rate of return of 17.50% on net average fixed operating assets (excluding assets financed through Government grants and customers' contribution), under tariff regime governed by Oil and Gas Regulatory Authority (OGRA). After making all adjustments made by the Regulator, the total rate of return reduced from 17.50% to 4.68%. The delay in publication of Annual Accounts, 2012 is attributable to delayed decision by the Regulator in respect of Final Revenue Requirement.

Had these financial statements been prepared in accordance with the OGRA's decisions dated December 2, 2010 and May 24, 2011, the Company for the year ended June 30, 2012 would have reported an after tax loss of Rs 1,558 million decrease in opening retained earning by Rs 3,759 million and a negative EPS of Rs 2.70.

Operational Review

The Transmission network of your Company is spread over 7,654 Kms high pressure pipelines, ranging from 4 inches to 36 inches diameter, across its area of franchise.

During the year under report, 412 new towns, villages, District head Quarters (DHQs) & Tehsil Head Quarters (THQs) were connected with the existing system by laying 7,151 Kms of distribution mains and service lines. A total of 2,494 towns, villages, DHQs and THQs now exist on the Company's network, which are being facilitated with natural gas facility at their door step.

The Company in line with its Vision and Mission Statements has improved the quality of life of its consumers by providing 249,437 new domestic, 1,340 commercial, and 96 industrial gas connections during the year under review.

Projects

Your Company commissioned 40 Kms transmission pipeline by the end of FY 2011-12 whilst work on 80 Kms transmission lines is in progress. Thus gas facility was extended to various localities / towns and industrial units across Punjab and Khyber Pukhtunkhwa.

With the passage of time, your Company has been able to gain strength in the areas of planning, designing and construction of pipelines and has emerged as one of the most reliable Engineering and Procurement Construction (EPC) Contractor. During the period under review, the Company has completed a number of in-house and contract projects, whereas few are in progress. Completion of these projects will inject an additional 350-375 MMCFD in the Company's system.

Compression of Gas

Compression plays vital role in the transmission of natural gas available from various gas fields, by maintaining adequate gas pressure and flows in the Transmission System, to meet the gas demands of consumers located on SNGPL Distribution Network. Eleven compressor stations are being operated by the Company at various locations for this purpose. These stations are being optimally and efficiently operated.

Corrosion Control

The Company is proactive in protecting its underground steel pipeline network, from corrosion and rust by applying Cathodic Protection (CP) techniques through 1405 Cathodic Protection (CP) Stations. Furthermore, your Company has adopted the international standard of Quality Assurance.

Un- Accounted For Gas (UFG)

The increasing price of natural gas and inadequate supply exposes the Company to risk of pilferage by unscrupulous elements. Furthermore, the Company's constraint to supply gas to retail consumers in place of bulk consumers, per socio-economic agenda of the Federal Government (FG), also increases the UFG losses. The Board and the Management are conscious of this drain on the Company's profitability and are making constant efforts to control the same. UFG Control activity is monitored by a special committee of the Board. The Management under its guidance is cognizant of controlling the UFG losses.

Regular inspection of consumers, particularly industrial and commercial consumers is carried out to unearth the gas pilferage cases. Action against non consumers has increased considerably and cases of non consumers are being actively pursued at relevant forums. Installation of GPRS modems for remote communication of data is underway. This system is being utilized to identify the theft

and measurement error cases. A number of GPRS/GSM based EVCs have been installed and are operational. In addition, the available data is being analyzed to identify consumers involved in violation of load management schedule.

During the year under review, a media campaign was launched against the gas pilferers, wherein the general public was invited to play their role in controlling the gas pilferage by informing/reporting the department at 1199 about the gas pilferers. Above ground leakage rectification program is also being followed to reduce loss due to leakages.

The Company has acquired and is using the laser leak detection equipment for identification of underground leakages. Replacement of those segments of distribution network whose integrity is doubtful is underway.

It is to be noted that supply of gas to certain areas is resulting in huge loss to the Company as the UFG in these areas is much beyond the approved ceiling imposed by OGRA. In these circumstances, the Company has to seriously consider the possibility of disconnecting gas to such areas in line with best commercial practices, as without such an action the Company and its shareholders, the main owner being the Government of Pakistan, are suffering huge revenue loss. However, if such an action is not approved by

the stakeholders, the review of UFG targets by OGRA/MP&NR will become essential so that the Company continues to remain financially viable.

The Management and the Board are confident of curtailing UFG losses to a great extent by optimally employing all available resources. The Company is also pursuing implementation of pending adjustments in UFG benchmark with the Regulator, FG and other relevant forums, arising from change in operating conditions beyond its reasonable control. The Company is hopeful of the resolution of this long standing issue.

The Board proposes their reappointment as auditors for the financial year ending June 30, 2013 on the recommendation of the Audit Committee.

Risk Management

The Company is facing a challenge of increasing gap between demand and supply of natural gas due to lack of foreign investment in oil and gas exploring activities in the last decade, as a result of law and order situation faced by the country. At operational level, the Company's main concern is to minimize Un-accounted for Gas (UFG). The Company is also facing challenges in the areas of currency, credit and liquidity in respect of financial risks. The Board is determined to effectively combat these challenges through intensive planning, timely decision making and strategic load management. Concerted efforts are being made to minimize the said gap by exploring alternative opportunities viz importing LPG/LNG. Also, best possible efforts are being made by

increasing the vigilance and physical inspections at the consumer's premises in order to curtail the UFG within permissible limits.

The Company has also laid down an Energy Efficiency audit plan for the industrial unit in order to get optimum benefits from the available resources.

Share Watch

The Company's share opened at Rs. 19.92 on July 01, 2011 and closed at Rs. 16.89 on June 30, 2012. During the period under review, the highest price of the share was Rs. 23.60 and the lowest was Rs. 15.25. The market capitalization as on June 30, 2012 was Rs. 9,738 million

Future Outlook

Your Company is pursuing to undertake supply of Synthetic Natural Gas (LPG-Air Mix) as a replacement of natural gas to help ease the prevailing energy crisis in the country. The Company is also working to bottle and market LPG cylinders to the prospective areas to supplement the demand for energy.

The Board has also decided to review the policy of meeting capital expenditures from its own resources as well the disconnection policy in respect of defaulting consumers, in order to improve the financial results.

The future outlook of the Company may be impacted by the court case pending in Lahore High Court (LHC) against OGRA's tariff decision, in which the Company has proposed the following:

- Treatment of Late Payment Surcharge (LPS) as Non Operating income, being a non regulated income.
- b) Rationalization of UFG benchmark since the previous benchmark was introduced without consultation with the gas companies and the independent experts were not engaged. Also, the base operating conditions prevalent at the time of introduction of benchmark like cost of gas, bulk retail ratio, etc, which were beyond the control of the Company, have now become lopsided, thereby adversely impacting the Unaccounted for Gas (UFG).

Maximum penalty that OGRA may impose for a particular financial year could not exceed Rs. 750 million per annum and therefore UFG penalties imposed by OGRA are very excessive and outright illegal.

It is highlighted that the Company will be adversely impacted for the year under review by Rs 4.6 billion (after tax), in case of unfavourable LHC decisions. The Company may however get an additional amount of Rs 3.4 billion (after tax) in case the LHC restricts the amount of maximum penalty imposed by OGRA.

It is further pointed out that OGRA has determined the Final Revenue Requirement (FRR) for FY 2011-12, keeping in view the Interim LHC Court Order, while failing to incorporate appropriate allowance on account of Non Consumers, minimum volume and Law & Order, thereby adversely impacting the Company on account of Rs. 3.9 billion.

In case of an adverse decision from Honourable LHC, the Company financial results would be adversely affected, since the applicable tariff in such instance would be computed on the basis of 4.5% UFG. The long term viability of the Company is sound.

Acknowledgements

Your Directors wish to place on record their appreciation for the continued support and patronage received from shareholders and its valued customers. We wish to acknowledge the dedication and commitment of all the employees who contributed valuable services, to sustain all its operations.

We also place on record our acknowledgement for the continued guidance and support received from the Government of Pakistan, Ministry of Petroleum & Natural Resources and Oil & Gas Regulatory Authority (OGRA).
