Census of Manufacturing Industries is one of the core activities of PBS, conducted after every five years with the last one in 2005-06.

This report is continuation of the CMI 2005-06 with disaggregation at district level. It include the district level industrial input and output indicators along with district ranking in regards to industrial development.

I hope that researchers, policy makers, government/non-government users and international agencies would find this document useful. Suggestions for improvement are always welcome.

## **PREFACE**

Census of (Large Scale) Manufacturing Industries (CMI) is conducted by Pakistan Bureau of Statistics (PBS) in collaboration with Provincial Directorates of Industries and Bureaus of Statistics (BOS) under the Industrial Statistics Act 1942 and General Statistics Act 1975. CMI is conducted after five years and this report is for the year 2005-06.

The CMI measures production, structural changes of Large-Scale Manufacturing Industries (LSMI) and provides data on quantities and values of inputs and outputs, census value added, contribution to GDP, fixed assets, stocks, employment & employment cost and industrial taxes. It takes into account the new developments in the industrial field, captures new industrial products and establishments and develops new weights for Production Index of Manufacturing.

CMI covers manufacturing establishments which are registered or qualify for registration under Factories Act 1934. Defense and government workshops engaged in manufacturing activities registered under Factories Act are excluded.

We are making all out efforts to improve industrial statistics. The CMI 2005-06 report was published earlier with province-wise disaggregation. This report carries the work further and gives disaggregation of data at district level for some important key indicators. It is expected that the district level data will be useful to data users and researcher.

Suggestions in this respect from the users will always be welcomed and appreciated.
