PREFACE

The fourth decennial population census was conducted from 1st to 15th March, 1981. This preceded by the first ever fullfledged Housing Census from 1st to 15th December, 1980. In the Population Census, two questionnaires were used; a short one (Annexure-A) containing questions on names of household members, their relationship to head of household, sex, age, marital status, religion, literacy, ability to read the Holy Quran (for Muslims only), educational attainment and language spoken in the household and a long one (Annexure-B) which included all questions of the short questionnaire and some more, namely, field of education, district of previous residence, duration of residence at present district, activity, employment status, occupation, industry, disability, etc. The long questionnaire was used for households selected on probability basis. The sample covered 43.9 percent of households in urban areas and 4.8 percent in rural areas.

This report comprises four parts. In Part-I, general description of the district and the main findings of the 1980 Housing Census and the 1981 Population Census have been highlighted. Part-II and Part-III consist of Statistical Tables of the Housing Census and the Population Census respectively. In Part-IV, various annexures mentioned in the text of this report have been given.

The tabulation of topics common in both the questionnaires pertains to complete enumeration, whereas tabulation of additional topics in the long questionnaire are the estimates based on the sample data.

The number and scope of statistical tables have been extended and cover data from the Housing Census (Annexure-D) also. Definitions and concepts of the topics in the questionnaires and tables are given at annexure-E. Map of Bannu district is at annexure-1.

Population Census, conducted once in a decade, is a gigantic operation of immense national importance. This report gives a demographic profile of the district. Thousands of field and office workers have contributed in producing this report. Our Organisation owes a deep debt of gratitude to all those who worked at different stages of census operations and made their inputs for this final output. We also hope that the data presented in this report will be used for planning the progress of the people of this place.

Dr. Akhtar Hasan Khan,
Census Commissioner.

GENERAL DESCRIPTION OF THE DISTRICT AND MAIN FINDINGS OF THE CENSUSES

SECTION 1—GENERAL DESCRIPTION OF THE DISTRICT

1.1 LOCATION

There are different explanation as to the derivation of the name Bannu. The Aryan, who occupied the land, around 2500 B.C., had mentioned it as Wano in their book Rigvaid. The Bannuchis who claim to have descended from Bannu, the wife of Shitak, the conqueror of the area, named it as such after the mother of the conquering tribe. In the writings of Chinese pilgrims Fa-Hian and Hiuen Tsang, it appears that the Bannu valley was known as "PONA" which afterwards changed to Bannu.

The district lies from 32°-18' to 33°-05' north latitudes and 70°-23' to 71°-16' east longitudes.

It is bounded on the north by Kohat district, on the east by Mianwali district, on the south by D. I. Khan district and on the west by Tribal Area adjoining Bannu District, South Waziristan Agency and Tribal area adjoining D. I. Khan District.

The total area of the district is 4,391 sq. k.m.

1.2 TOPOGRAPHY

The district forms a circular basin, surrounded by the hills on all sides. On its north are the hills of Kohat district, on the east, is the southern extremity of the hills of Karak Niazi range, on the south are the Marwat and Bhattani ranges, which divide it from D. I. Khan district, and on the west are the hills of Kharaghora and Bhattani ranges. These hills nowhere attain any great height. The highest point in these ranges has an altitude of only 1,200 metres. The Marwat range culminates in Sheikh Budin which rises abruptly to a height of 1,376 metres. The major part of the district consists of an alluvial plain. The southern part is made up of undulating sand dunes. The western part of the district is formed of stiff clay covered at the foot of the hills by layer of stones. The whole area is intersected by hill torrents and deep ravines. The general elevation of the plain is about 300 metres above sea level.

1.3 CLIMATE

The temperature distribution is almost the same all over the district. Bannu is however, moist in hot season. The sandy plain of Marwat is hotter during day and cooler in night as compared to other surrounding areas. A table showing the monthly mean maximum and minimum temperature and precipitation, recorded at Bannu, is given below :—

Month	Mean temperature (°C)		Precipitation (millimetres)

January	18.5	5.1	22
February	20.7	8.2	30
March	25.2	12.8	47

Irrigation is done by means of canals and tube-wells. The Kurram and Cambila rivers flow in the district branching out canals and nullahs like a spider web. A sizeable area is irrigated by lift irrigation.

The acreage and production of major crops, grown during 1980-81, are given below :—
