PREFACE

The fourth decennial population census was conducted from 1st to 15th March, 1981. This preceded by the first ever fullfledged Housing Census from 1st to 15th December, 1980. In the Population Census, two questionnaires were used; a short one (Annexure-A) containing questions on names of household members, their relationship to head of household, sex, age, marital status, religion, literacy, ability to read the Holy Quran (for Muslims only), educational attainment and language spoken in the household and a long one (Annexure-B) which included all questions of the short questionnaire and some more, namely, field of education, district of previous residence, duration of residence at present district, activity, employment status, occupation, industry, disability, etc. The long questionnaire was used for households selected on probability basis. The sample covered 23.8 percent of households in urban areas and 4.9 percent in rural areas.

This report comprises four parts. In Part-I, general description of the district and the main findings of the 1980 Housing Census and the 1981 Population Census have been highlighted. Part-II and Part-III consist of Statistical Tables of the Housing Census and the Population Census respectively. In Part-IV, various annexures mentioned in the text of this report have been given.

The tabulation of topics common in both the questionnaires pertains to complete enumeration, whereas tabulation of additional topics in the long questionnaire are the estimates based on the sample data.

The number and scope of statistical tables have been extended and cover data from the Housing Census (Annexure-D) also. Definitions and concepts of the topics in the questionnaires and tables are given at annexure-E. Map of D. I. Khan district is at annexure-1.

Population Census, conducted once in a decade, is a gigantic operation of immense national importance. This report gives a demographic profile of the district. Thousands of field and office workers have contributed in producing this report. Our Organisation owes a deep debt of gratitude to all those who worked at different stages of census operations and made their inputs for this final output. We also hope that the data presented in this report will be used for planning the progress of the people of this place.

Dr. Akhtar Hasan Khan,
Census Commissioner.

GENERAL DESCRIPTION OF THE DISTRICT AND MAIN FINDINGS OF THE CENSUSES

SECTION 1—GENERAL DESCRIPTION OF THE DISTRICT

1.1 LOCATION

Dera Ismail Khan is the southern most district of the N.W.F. Province. The district derives its name from the district headquarters town D.I. Khan, which is also the headquarters of the administrative division. Sultan Hussain, the Governor of Multan, in 1469, made over the Indus Frontier to a Baluch Malik, Sohrab Khan who founded the town of Dera Ismail Khan, Dera Fatch Khan and Dera Ghazi Khan naming them after his three sons. According to another account it was founded by Ismail Khan himself.

The district lies from 31°—15' to 32°—31' north latitudes and 70°—05' to 71°—22' east longitudes. It is bounded on the north by Bannu district, on the east by the Indus river across which is Mianwali district, on the south by Dera Ghazi Khan district and on the west by Tribal Area adjoining D.I. Khan district also known as Bhattani and Sherani Areas.

The area of the district is 9,005 sq. k.m.

1.2 TOPOGRAPHY

The district is a dry alluvial plain. The only hills within the district are those of the Khisor range which is also known as Ratta Koh (i.e. red mountain). These hills have a length of about 80 kilometres and breadth of about 10 kilometres and run close to the Indus river in a north-east south-west direction. Further north to the Khisor range is the Marwat range which runs parallel to the Khisor range along the border of D.I. Khan and Bannu district upto Pezu Pass. From Pezu Pass begin the Bhattani range running in a north west direction. These hills also form the border of D. I. Khan and Bannu districts. The western part of D.I. Khan district is bordered by the hills of Tribal Areas adjoining D.I. Khan District.

The Major part of the district is a level plain. It consists of an arid and stony plain. The whole plain, which extends down into Dera Ghazi Khan district of the Punjab is known as Derajat. The western part is intersected by numerous hill torrents which flow from the eastern slopes of the hills of Tribal Area adjoining D. I. Khan district. For greater part of the year these are almost dry, but after rains they become roaring torrents bringing down water with heavy silt.

1.3 CLIMATE

The climate is dry and hot in summer. The winter is cold and bracing and, frost is severe. The monthly mean maximum and minimum temperature and precipitation, recorded at Dera Ismail Khan, are given in the table below :—
