POPULATION CENSUS OF PAKISTAN 1981

Advance Tabulation on Labour Force by Occupation and Industries

The fourth decennial census of Pakistan was conducted from 1–15th March, 1981. Soon after its completion, demands for its data started pouring in. Consequently five census bulletins providing population data by sex upto Tehsil level and for individual urban localities were published. An early need of some more data on relatively important topics was also realised in view of the formulation of the Sixth Five Year Plan. It was, therefore, decided to release advance tabulation on the basis of a scientifically selected sample of 10 percent of the population in respect of a few variables namely sex, age, literacy, educational attainment and labour force. Accordingly a bulletin (No. 7) has already been released providing sex, age, literacy and educational attainment statistics. The current bulletin (No. 8) provides data on labour force of Pakistan (excluding FATA) and its provinces by their urban/rural distribution, by main occupations and economic activities.

Activity (Labour Force Participation Rates)

2. Advance tabulation reveals that 27.2 percent of population is in the labour force (i.e. working and not working but looking for work) whereas these figures for male and female are 49.8 and 2.1 percents respectively. If this data is worked out for population of 10 years and above then the labour force participation rates for total, male and female population come to be 40.1, 72.4 and 3.2 percents respectively. The following table gives the comparative figures of labour force participation for Pakistan and its provinces by male/female and rural/urban distribution :

Labour Force Participation Rates	Pakistan		N.W.F.P.		Punjab		Sind		Baluchistan	
	For all population	For population 10+	For all population	For population 10+	For all population	For population 10+	For all population	For population 10+	For all population	For population 10+
Both sexes	27.2	40.1	25.6	38.9	27.5	39.8	27.2	40.9	27.0	41.2
Rural	28.0	41.8	25.8	39.6	28.3	41.2	28.9	45.3	27.8	43.5
Urban	25.2	36.0	24.2	35.4	25.4	36.4	25.0	35.7	22.6	33.6
Male	49.8	72.4	47.6	71.8	50.3	72.2	50.1	73.1	49.8	73.8
Rural	51.9	76.5	48.5	73.9	52.1	75.4	54.4	82.2	51.8	77.4
Urban	44.9	63.1	42.9	61.1	45.6	64.1	44.6	62.4	39.3	55.9
Female	2.1	3.2	1.7	2.7	2.3	3.4	2.0	3.0	1.5	2.4
Rural	2.0	3.0	1.6	2.5	2.3	3.4	1.6	2.6	1.4	2.3
Urban	2.4	3.6	2.4	3.7	2.4	3.5	2.5	3.6	1.7	2.7

3. The labour force participation rate of 27.2 percent is rather low in comparison with 36.6 percent for Malaysia, 37.7 percent for Indonesia and 48.8 percent for Thailand. In most developed countries the labour force participation is about half whereas in Pakistan it is just more than a quarter.

4. Pakistan's low rate stems from negligible female participation. The female participation in Pakistan is 2.1 percent as compared to 25.2 percent for Indonesia, 45.7 percent for Thailand and 25.6 percent for Malaysia. The male participation rate of 49.8 percent is comparable with countries quoted above (Malaysia 47.5 percent, Indonesia 50.5 percent and Thailand 51.1 percent). Although, theoretically, participation rates are affected by level of industrialization, agricultural development, educational attainment, socio-economic norms, etc. but in case of Pakistan, the participation rate can only increase substantially if the female population is made economically active.

5. Age-specific labour force participation rates are given in the following table which indicates that they increase gradually from the lowest level of 20 percent for age group 10–14 to the maximum level of 52 percent for the age group 50–54 and then starts declining with advanced age. Nevertheless, 44 percent of the population in age group 60 years and above is engaged in economic pursuits reflecting the need for work even at this stage in the absence of alternate means of income and old-age financial support programmes.

Age Group	Total			Urban			Rural		
	Total	Male	Female	Total	Male	Female	Total	Male	Female
10 – 14	20.30	34.65	3.20	10.18	17.83	1.44	24.56	41.52	3.96
15 – 19	34.84	61.94	3.43	26.79	47.75	2.47	38.79	68.91	3.91
20 – 24	41.53	76.45	3.66	39.10	67.68	4.58	42.82	81.31	3.26
25 – 29	46.03	85.75	3.68	45.24	79.33	5.43	46.39	88.87	2.95
30 – 34	46.96	88.86	3.24	47.40	83.97	4.89	46.78	91.33	2.57
35 – 39	48.73	91.93	3.64	49.31	88.07	4.55	48.48	93.70	2.46
40 – 44	49.90	92.75	3.10	51.94	90.19	4.48	49.06	93.90	2.58
45 – 49	50.96	93.93	2.69	52.99	91.41	3.95	50.15	95.02	2.24
50 – 54	52.28	91.90	3.13	52.02	87.47	4.21	52.37	93.62	2.76
55 – 59	49.11	90.39	2.34	49.15	84.10	3.45	49.09	92.84	1.98
60 and above	44.21	75.65	2.34	36.41	60.96	2.99	46.55	80.12	2.12

Employment

6. Unemployment rate is proportion of persons looking for work to total of persons working and looking for work. The unemployment rate was found to be 3.1 percent at national level which varied from 2.3 in NWFP to 3.3 percent in Sind. The unemployment rate of males was observed to be lower than that of females. The male unemployment rate was 2.9 percent which varied from 2.1 in NWFP to 3.2 percent in Sind. The female unemployment rate was 7.5 percent, the highest being in Baluchistan, i.e. 8.6 percent. The

following table gives the unemployment rates of Pakistan and its provinces by male/female and rural/urban distribution.

Unemployment Rates	Pakistan	NWFP	Punjab	Sind	Baluchistan
Both sexes	3.1	2.3	3.2	3.3	3.1
Rural	2.3	2.0	2.5	1.6	2.9
Urban	5.2	3.7	5.0	5.8	3.9
Male	2.9	2.1	3.0	3.2	2.9
Rural	2.2	1.9	2.4	1.5	2.8
Urban	5.1	3.6	4.9	5.8	3.9
Female	7.5	6.5	7.6	7.1	8.6
Rural	7.1	6.3	7.1	6.7	9.3
Urban	8.3	7.4	8.8	7.4	5.2

7. It will be observed from the above table that the same type of pattern is observed among urban male of all provinces but its level is the highest in Sind, *i.e.* 5.8 percent followed by the Punjab 4.9 percent, Baluchistan 3.9 percent and NWFP 3.6 percent. However, the unemployment rate for urban female was lowest in Baluchistan, *i.e.* 5.2 percent as against the national figure of 8.3 percent and the same for the Punjab was 8.8 percent followed by Sind and NWFP *i.e.* 7.4 percent each.

8. The Pakistan's unemployment rate in terms of people looking for work is, therefore, quite low as compared to other 'developing and developed countries. The outlet provided by emigration, low female participation and under-employment in agriculture, account for this healthy statistic.

Economically Active Population by Occupation

9. Economically active population of Pakistan is distributed among the following occupational groups :—

Occupational Group	Pakistan		
	Total	Urban	Rural
Professional, technical and related workers	3.8	6.5	2.8
Administrative and managerial workers	1.3	2.5	0.9
Clerical and related workers	3.1	7.5	1.5
Sales workers	8.1	18.5	4.2
Service workers	4.1	7.9	2.8
Agricultural, animal husbandry and forestry workers, fishermen and hunters	50.0	46.4	65.9
Production and related workers, transport equipment operators and labourers	25.1	41.8	18.0
Workers not classified by occupation	4.4	8.9	2.8

10. Although agriculture now accounts for 27 percent of the G.N.P. but half of Pakistan's total labour force and two-thirds of the rural labour force is engaged in it. A quarter of the labour force are "production and related workers, transport equipment operators and labourers". Unfortunately the professional, technical and related workers are only 3.8 percent of the total labour force. This ratio has to increase in order to fulfil the skills required for accelerated economic growth.

Economically Active Population by Industries

11. Similarly economically active population of Pakistan in urban/rural areas is distributed among the following industrial groups:—

Industrial Group	Pakistan		
	Total	Urban	Rural
Agriculture, forestry, hunting & fishing	52.57	7.29	68.66
Mining and quarrying	0.40	0.28	0.44
Manufacturing	9.25	18.41	5.99
Electricity, gas and water	0.60	1.19	0.39
Construction	4.21	6.48	3.41
Wholesale & retail trade; restaurants and hotels	9.43	21.78	5.05
Transport, storage and communication	4.14	8.62	2.55
Finance, insurance, real estate and business services	0.76	2.11	0.28
Community, social & personal services	13.74	26.50	9.21
Activities not adequately defined	4.90	7.33	4.04

12. In urban areas one fifth of the labour force are engaged in whole-sale/retail trade and restaurant/hotels. A quarter of the labour force are working for community, social and personal services *i.e.* government services, educational and health services, social and community related services, recreational services, personal (laundry, barbering, etc.) household services and minor repair services. Hardly two to three percent persons are engaged in mining.

13. In rural areas majority of labour force (68.7 percent) are engaged in agriculture, forestry, etc. The next higher industrial group in rural areas is community, social and personal services which accounts for one tenth of the employed persons.

14. It may be advisable to draw here a distinction between the occupational group, "agriculture, animal husbandry and forestry workers, fishermen and hunters" and industry group "agriculture, forestry, hunting and fishing". Occupation means the main profession or trade of a person or the kind/type of work done by him, irrespective of the economic activity or industry in which he does this job. Industry or economic activity means the activity of an establishment in which a person works irrespective of his occupation. For example if a person tills his own soil or works as share cropper, his occupation will be

"farmer" and his industry or economic activity will be "agriculture" but if a person is working for a fertilizer factory and is tilling their demonstration plots for measuring the response of factory's fertilizer on various crops, his occupation will remain "farmer" but his industry will be "manufacturing". Furthermore, a tractor driver working at a farm will be classified in the occupational group "production and related works, transport, equipment operators and labourers" and his economic activity or industry will be "agriculture, forestry, hunting and fishing". Whereas if a tractor driver is engaged in construction, repair, maintenance of roads, etc., his occupational group will remain the same but industry or economic activity will fall under "construction" economic activity.

Economically Active Population by Employment Status

15. A little more than half of the gainfully employed workers are self-employed, i.e., have their own business/farm and are working without the assistance of employees. One fourth are working as employees, of which one-third are working in the government which means that every twelfth worker in Pakistan is a Government employee. About 15 percent are assisting their family without any remuneration.

Employment Status	Total	Rural	Urban
All employed	100	100	100
Self employed	55.55	61.07	40.03
Employee (Govt.)	8.34	4.52	19.86
Employee (Non-Govt.)	18.80	13.92	32.52
Employer	1.98	1.69	2.80
Unpaid family helper	15.13	18.80	4.79

16. Sixty-one percent of the rural workers are self-employed, i.e., running their own business/farm without any assistance of employees but in urban areas this category is forty percent. Nearly one-fifth of workers are unpaid family helpers in rural areas, whereas these are about five percent in urban areas. Slightly more than half of the urban workers are employees, almost a third in the government and a fifth in the private sector. The employer category is generally small, ranging from 1.69 percent in rural areas to 2.80 percent in urban areas.

Dated : 29th January, 1983.
