### **Directors' Report**

On behalf of the Board of Directors of **Faisal Spinning Mills Limited**, I am pleased to submit audited financial statements of the Company for the year ended 30th June 2016.

### Overview

The company has earned profit after tax of PKR 169.214 million during the year ended 30th June 2016 against the last year profit after tax of PKR 174.548 million. The earning per share of company is PKR 16.92 as compared to PKR 17.45 in previous year.

### **Economic Challenges and Current Crisis**

Economic growth accelerated in Pakistan in Fiscal Year 2016 on the cumulative impact of sharply lower oil prices, improved security and government's macroeconomic and structural reform. Pakistan economy recorded highest GDP of 4.71% since 2008-09. But GDP of 4.71% is not at par. Concrete steps have to be taken by the government in order to achieve GDP at par. Current account deficit and declining export are now major concerns.

Pakistan Textiles goods are not competitive in world market. Our competitors are manufacturing goods in cost effective manner based on latest machineries, technological innovation and government support for capital and infrastructure. Continous depreciation of Pakistani Rupess is also impecting on economy. Government should develop and implement a textile policy on broad basis in order to enable exporters to compete in the world.

Based on our review, nothing has come to our attention which causes us to believe that the statement of compliance does not appropriately reflect the Company's compliance, in all material respects, with the best practices contained in the Code as applicable to the Company for the year ended June 30, 2016.

Notes to the financial statements For the year ended 30th June 2016

#### Standards, interpretations and amendments

IFRS 10 'Consolidated Financial Statements'

IFRS 11 - Joint Arrangements

IFRS 12 – Disclosure of Interests in Other Entities

IFRS 13 - Fair Value Measurement

#### Description

IFRS 10 'Consolidated Financial Statements'– (effective for annual periods beginning on or after 1 January 2015) replaces the part of IAS 27 'Consolidated and Separate Financial Statements'. IFRS 10 does not have any impact on the financial statements of the company.

IFRS 11 'Joint Arrangements' (effective for annual periods beginning on or after 1 January 2015) replaces IAS 31 'Interests in Joint Ventures'. Firstly, it carves out, from IAS 31 jointly controlled entities, those cases in which although there is a separate vehicle, that separation is ineffective in certain ways. These arrangements are treated similarly to jointly controlled assets/operations under IAS 31 and are now called joint operations. Secondly, the remainder of IAS 31 jointly controlled entities, now called joint ventures, are stripped of the free choice of using the equity method or proportionate consolidation; they must now always use the equity method. IFRS 11 has also made consequential changes in IAS 28 which has now been named 'Investment in Associates and Joint Ventures'. The amendments requiring business combination accounting to be applied to acquisitions of interests in a joint operation that constitutes a business are effective for annual periods beginning on or after 1 January 2016. The adoption of this standard does not have an impact on Company's financial statements.

A deferred tax liability is recognized for all taxable temporary differences. A deferred tax asset is recognized for deductible temporary differences to the extent that future taxable profits will be available against which temporary differences can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax is not recognized for timing differences that are not expected to reverse and for the temporary differences arising from the initial recognition of goodwill and initial recognition of assets and liabilities in a transaction that is not a business combination and that at the time of transaction affects neither the accounting nor the taxable profit.

Changes in interest rates can affect the rates charged on interest bearing liabilities. This can result in an increase in interest expense relative to financial borrowings or vice versa. The Company manages its risk by interest rate swapping, maintaining a fair balance between interest rates and financial assets and financial liabilities. The effective interest rates for the monetary financial assets and liabilities are mentioned in respective notes to the financial statements.

The management believes that allowance for impairment of trade debts past dues is not necessary, as these comprise amounts due from old customers, which have been re-negotiated from time to time and are also considered good.
