P R E F A C E

The District in Pakistan is the basic unit of administration under a Deputy Commissioner and the focal point of all social, cultural, economic, administrative and developmental activities. It was, therefore, for the first time, decided in the 1961 Census that a separate report on each District be published. The need for publishing these District Census Reports was all the more felt in the absence of the regular publication of the District Gazetteers. Keeping in view these considerations it was decided to publish the District Census Reports of the 1972 Census as well. These reports will be found useful by the local administrators and planners in their day to day work and will also be of interest to the general reader since dull and dreary statistics of the District have been presented against the living background of its history, geography, traditions and culture.

2. The District Census Reports are in two parts :

PART I—General description of the District.

PART II—Statistical tables.

3. PART I—The general description of the District is further divided into the following five sections :

(i) *Geography*

Area, boundary, geology and physical features, climate, flora and fauna, forestry, irrigation, agriculture, industries, transport and trade.

(ii) *History and culture*

History, races and tribes, food and health, dress, occupations, culture, customs and traditions.

(iii) *Administrative set-up*

Executive, judiciary and revenue system, educational, medical and health facilities.

(iv) *Description of important/historical places*

Importance, cultural aspects, socio-economic conditions.

(v) *Population*

Growth, distribution and composition of population.

It also includes 'District at a Glance' containing basic facts about the District and a few photographs of places of importance and scenic beauty as well as of the people and their cultural heritage. These photographs will be found to be fairly representative of the places and people of the District.

4. PART II—It includes twelve statistical tables. Statistics have been presented in these tables at different geographical levels keeping in view the importance of these statistics at these levels. Tables 4, 5 and 12 deserve special mention. Table 4 not only gives population by sex and age for rural and urban areas at District level but also at Tehsil/Taluka level and for individual urban areas. Table 5, which provides population by sex, age group and marital status has also been tabulated at the geographical levels similar to that of Table 4. These statistics had not been published in earlier censuses at these geographical levels and will be found of much help for the purpose of research on population dynamics which at the moment has engaged the attention of planners and researchers in all walks of life because of the population explosion problem being faced by Pakistan and many other countries. Table 12 gives Mauza statistics on population by sex, number of households and household size besides land area and local facilities. This table gives more information about Mauzas than published for the 1961 Census.

5. The reader may find that the 1972 District Census Reports do not contain all the data which was available in similar reports of the 1961 Census. This is because while planning the 1972 Census, many departures were made in the methodology and procedures from the practices followed in the past censuses with a view to improve the reliability and timeliness of data at as low a cost as possible.

(ii)

6. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count and Housing, Economic and Demographic Survey :

PHASE I—The Household Listing was conducted from the 1st to 15th September, 1972 just before the Big Count in order to provide an up-to-date list of households for enumeration in the Big Count.

PHASE II—The Big Count was a cent-percent count of the total population conducted from the 16th to 30th September, 1972. In this operation basic characteristics of each individual, i.e., name, relationship to the head of household, sex, age, marital status, religion and literacy were collected. The District Census Reports contain data collected during this phase of the census operation only.

PHASE III—The Housing, Economic and Demographic (HED) Survey was a sample survey conducted during August to November, 1973 to obtain detailed data on almost all topics usually covered in a population and housing census. The HED Survey results will be published separately and will provide data on housing and housing conditions, migration, educational attainment, labour force, fertility, etc.

7. The initial responsibility of writing the District Census Reports was assigned to the Census District Officers/Deputy Commissioners concerned. These drafts were received in the provincial offices of the Census Organization where these were further examined. When the reports were received at the headquarters, it was found that in some cases the reports were not in accordance with the layout and instructions issued by the Census Organization. Besides, in many cases these lacked up-to-date information. Therefore, the work of vetting these reports was assigned to the officers of the Census Organization. There is no doubt that the first part of the District Census Reports of the 1972 Census are largely adaptations from the 1961 District Census Reports but these have been modified and revised wherever necessary to bring the information up-to-date as far as possible.

8. Statistical tables given in this report have been produced on computer. The use of computer for processing of census data was made for the first time. The work relating to the preparation of data for input to computer and quality control was the responsibility of the Data Preparation Centre of the Census Organization. The tabulation of data was done on the computer of the Statistics Division.

9. I am grateful to the officers and staff of various Ministries, Departments of the Federal and Provincial Governments and their officers at District and lower levels, public spirited men and women who gave their unstinted support, in the execution of the 1972 Census and preparation of the District Census Reports. I gratefully acknowledge the help that the Chief Secretaries of the Provincial Governments gave us in this regard. It was indeed creditable that in the atmosphere prevailing in 1972, they were able to collect thousands of enumerators and supervisory staff to undertake the huge task of census taking all over the country.

10. My special thanks are due to the Joint Secretary, Statistics Division and his officers for their valuable help for processing the census data on their computer. I am grateful to the Surveyor-General of Pakistan and his staff who have been generous with the supply of maps as and when required for the census work. I would also like to thank the Managing Director, Printing Corporation of Pakistan Ltd., and his officers for their unstinted support and prompt service at all stages of printing of the census reports.

11. I must also thank officers and staff of the Census Organization who worked untiringly in planning and conducting the census and to edit these reports. The material and data contained in these reports represents cumulative efforts of a large number of persons, both paid and unpaid, to whom I acknowledge a debt of gratitude. I am grateful to all of them and in the end I would like to thank again all those who took part in the 1972 Census operation in any capacity to make it a success.

BRIGADIER (Retd.) ABDUL LATIF,
Census Commissioner.

CENSUS PLANNING AND PROCEDURES

In planning the 1972 Census criticism about incomplete coverage and reliability of the 1961 Census data was kept in view at all stages of planning. Difficulties and problems faced in the planning and execution of the 1961 Census were also not lost sight of. The last census was found to suffer from lack of technical staff, inadequate maps, insufficient tabulation equipment, unscientific pre-testing and post-enumeration evaluation. In addition, the 1961 Census schedule contained too many questions resulting in not only under-enumeration but also lack of response to some of these questions. Therefore, certain fundamental departures were made in the 1972 Census from the practices followed in the 1961 Census with a view to overcome the above shortcomings.

2. The Census Commissioner as well as the Technical Advisory Committee were of the view that the basic questions on individuals, i.e., sex, age, marital status, etc., be asked on hundred percent enumeration basis, while all other questions on housing, economic and demographic characteristics be asked on sample basis. Thus, not only was the 1961 questionnaire bifurcated, but a few more questions on population and housing characteristics were added. It was also decided that instead of carrying out the post-enumeration census evaluation survey by the Census Organization themselves (which obviously would have produced biased results) the census evaluation survey be planned and conducted under the direction and supervision of an independent agency. To avoid confrontation of any problems in conducting the census pre-testing and rehearsal of all census steps was scientifically planned and conducted in urban as well as rural areas in all the Provinces. In order to make available the census results expeditiously and correctly the data was processed and tabulated on computer. With a view to creating discipline and getting the desired results from the enumerators, they were paid honoraria.

3. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count, and Housing, Economic and Demographic Survey. The Big Count provided for enumeration of all persons living in

Pakistan on the dawn of 16th of September, 1972 excluding foreign diplomats and their dependent family members. All persons were enumerated at their usual places of residence, i.e., the place where they lived and slept usually (dejure enumeration). However, persons of armed forces (including prisoners of war) were enumerated at the places where their families were living because of the circumstances prevailing at the time of census taking. A simple questionnaire was used providing for collection of data on name of person, his relationship to head of household, sex, age, marital status, religion and literacy. This information was collected on hundred percent enumeration basis, whereas the data on complex population characteristics and housing topics was collected later through a sample survey. The Big Count was conducted from the 16th to 30th September, 1972 and was preceded by Household Listing operation for 15 days with the purpose to identify households for enumeration in the Big Count. The Big Count and Household Listing operations were conducted simultaneously in a few hilly areas which were not easily accessible to avoid the enumeration staff going twice to those areas. The sample survey called the Housing, Economic and Demographic (HED) Survey was conducted from August to November, 1973 and provided for collection of data from three hundred thousand households on housing conditions, migration, educational status, labour force, fertility, etc. Report on these aspects will be published separately. These steps resulted in a simple schedule and smaller assignments for enumerators and thus ensured better coverage and reliable data.

4. Improvements were made in delimitation of census areas by way of providing in advance corrected lists of Mauzas and updated maps of urban areas, which later helped the enumerators considerably in their enumeration work.

5. To overcome omissions of households and persons in enumerated households, special reporting centres were established in each village and different places in towns and cities so that people could report the missed households or persons. Wide publicity was given in this regard beside the regular census publicity campaign.

(iv)

6. In spite of the fact that the schedule of the Big Count was quite simple, elaborate arrangements were made that enumerators and their supervisors were properly and adequately trained in their duties. This included practical training before conducting the actual enumeration. Detailed procedures and guidelines for enumerators and their supervisors were laid down in two manuals—Manual of Instructions for Enumerators and Manual of Instructions for Supervisors. A Training Guide was also issued which contained specific and typical questions on the procedures and questionnaire to guide and provide answers in specific cases. This guide proved to be of immense value to the enumerators and the supervisory staff. Instructions which could not be covered in these manuals were issued later as Census Commissioner's Circulars. These instructions helped a lot in achieving uniformity in enumeration and better quality of reporting.

7. Some of the terms used in this report which may need explanation, are given below :—

URBAN AREA—Urban areas include Municipal Corporations, Municipal Committees, Cantonment Boards and Town Committees. Other places having a concentration of population of at least 5,000 persons in continuous collection of houses where the community sense was well developed and the community maintained public utilities, such as, roads, street lighting, water supply, sanitary arrangements, etc., were also treated as urban areas. These places were generally centres of trade and commerce with a population mostly non-agricultural and having comparatively higher literacy rate. As a special case, a few areas

having the above urban characteristics but population less than 5,000 persons were also treated as urban.

HOUSEHOLD—A household means a single person living alone or a group of persons living and eating together which may include family members, relatives, friends, servants and other non-relatives. Eating together implied common cooking arrangement.

AGE—Age has been reported in completed years except for infants whose age has been reported in completed months.

MARITAL STATUS—Marital status has been classified into never-married, married, widowed and divorced. Never married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as all other married persons living apart having a living wife/husband and who are not presently widowed or divorced. Widowed applies to a person whose husband or wife is dead and who has not married again. Divorced applies to both divorcer and divorcee, if not re-married.

RELIGION—Religion has been tabulated as reported by the respondents themselves.

LITERATE—A person who is able to read and write with understanding in any language is literate. This was a departure from the 1961 Census, where persons able to read and write (even without understanding) and able to read with understanding were treated as literates.

DISTRICT CENSUS REPORT

SANGHAR

PART I

GENERAL DESCRIPTION OF THE DISTRICT

DISTRICT AT A GLANCE

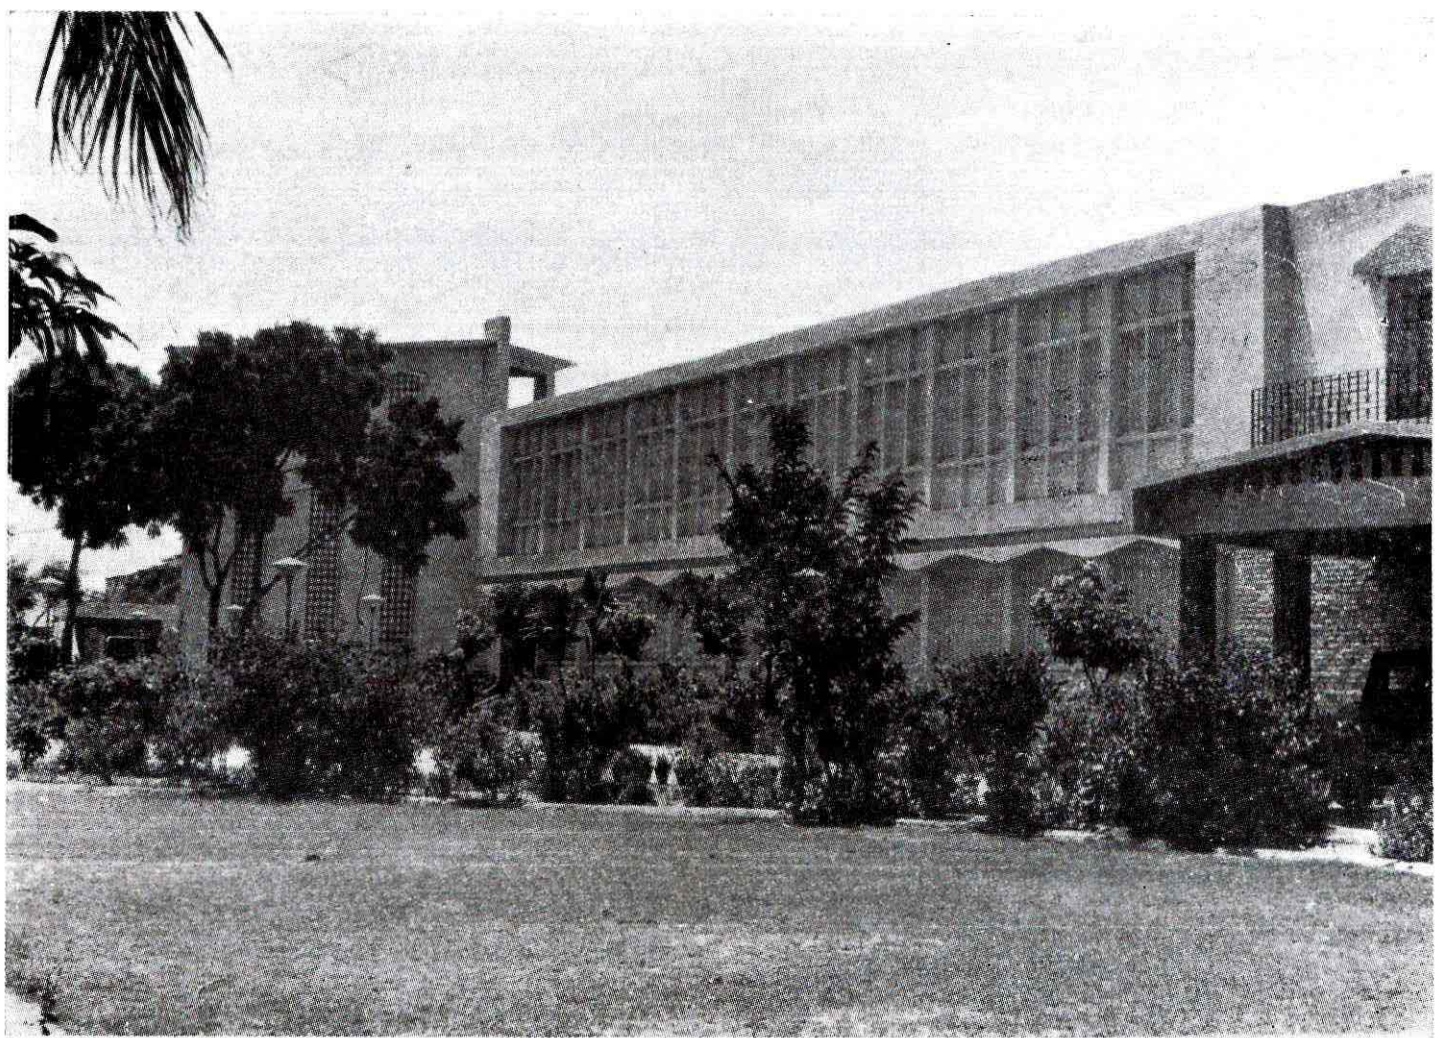

1. AREA	4,142 sq. miles
2. POPULATION	693,407 persons
3. DENSITY	167 persons per sq. mile
4. SEX RATIO (males per 1,000 females)	1,153
5. LITERACY	19.5 percent
6. MAIN LANGUAGES SPOKEN	Sindhi, Urdu, Punjabi and Balochi
7. TRIBES	Samat, Aryans, Rajputs and Syeds
8. ECONOMY	Mainly Agriculture and partly industrial
9. CLIMATE	Hot in summer and cold in winter with scanty rainfall
10. MAIN CROPS	Cotton, Wheat, Sugar-cane, Oilseeds and <i>bajra</i>
11. MAIN INDUSTRIES	Textiles, cotton ginning and pressing, flour mills and <i>daris</i>
12. COMMUNICATIONS	
(a) Metalled Roads	313 miles
(b) Unmetalled Roads	163 miles
(c) Railways	Pakistan Railways main line (Rohri-Hyderabad section) passes through the district.
(d) Air Services	—
(e) Post Offices	65
(f) Telegraph Offices	1
13. EDUCATIONAL FACILITIES	
(a) Universities	—
(b) Colleges	4
(c) High Schools	24
(d) Middle Schools	26
(e) Primary Schools	768
14. MEDICAL FACILITIES	
(a) Hospitals	2
(b) Dispensaries	10

15. IMPORTANT/HISTORICAL PLACES

Shahdadpur, ruins of Kot Bijar, Kuba Mir Shahdad,
Brahmanabad (Mansurah).

16. ADMINISTRATIVE DIVISIONS

(a) Tehsils/Talukas	4
(b) Qanungo/Supervisory Tapedar Halqas	17
(c) Patwar/Tapedar Halqas	127
(d) Mauzas/Dehs	414
(e) Municipal Committees	2
(f) Town Committees	3
(g) Cantonment Board	—
(h) Other Urban Areas	2

District Council Office, Sanghar.

SECTION 1—GEOGRAPHY

1.1 NAME, LOCATION, BOUNDARY AND AREA

Sanghar District derives its name from its headquarters town and was carved out of the districts of Tharparkar and Nawabshah in 1953. The district lies between 25°-30' to 26°-28' north latitudes and 68°-24' to 70°-13' east longitudes. It is bounded on the north by Khairpur District, on the north-west by Nawabshah District, on the east by Jaisalmer and Jodhpur (India), on the south by Tharparkar District and on the west and south-west by Hyderabad District. The total area of the district is 4,142 square miles.

1.2 GEOLOGY AND PHYSICAL FEATURES

The district on the whole is a flat alluvial plain except some portions of Sanghar and Khipro Talukas which are desert areas. It is a fertile district. There are no hills. The Indus used to flow through this district but changed its course about 962 A.D.

The district is a valley plain chiefly over-lain with alluvium trenched with river channels in some places and overridden by raised beds in others. The land is mostly level and the soil is rich in salts and minerals. This district is fed by the Nara stream and its distributaries and also the Nasrat Rohri Canal.

1.3 RIVERS AND LAKES

There is no river in the district but there are fresh water lakes in Sanghar Taluka.

1.4 CLIMATE

The climate is hot and dry in summer and cold and dry in winter. In summer, the maximum temperature goes upto 120°F, while in winter it goes down to 30°F. The average annual rainfall is about 7.76 inches.

1.5 FLORA AND FAUNA

The vegetation of this district is peculiar to its soil, and largely indicative of its hot and dry climate. *Babul* (*acacia arabica*) abounds in all parts of the district except sandy plains. Other trees are *kandis*, *sarih* (*almodia lebbek*), *neem* (*azadirachta indica*), *tathi* (*dalbergia sisso*), *lai* (*tamarix diocia*), *pipal* (*figus religiosa*) and *kirir*. The sand hills of the desert yield especially in rainy season fodder and other bushy growth varying in character, with the amount of salt in the soil for cattle while the water-logged area and canal banks are over-grown with elephant grass and ferns.

Sheep, camels, buffaloes, cows and goats are found everywhere. Deer and pig are found in desert and water-logged areas. Reptiles are found in the desert areas and crocodiles in the Nara Canal.

1.6 FORESTRY

The forests of this district produce timber, firewood, grass and *lac*. These products are mostly used locally. During 1972-73, the total area under forests was 22,804 acres which yielded 200,000 cft., timber and 611,000 cft., firewood. Its contribution to the Government revenue was Rs. 616,000. The area under forests is 0.86 percent of the total area of the district.

1.7 IRRIGATION

The entire district is fed by perennial canals, viz, Mithrao, Jamrao, Khipro, Dhoro, Samerjo, Main, and Nasrat Canals except the lower portion of Khipro Taluka which drains from the Sukkur Barrage. In some parts of Shahdadpur Taluka irrigation is done by tube-wells. The remaining area of the district is dependant on rainfall.

1.8 AGRICULTURE

Primitive methods of cultivation are still prevailing but the use of mechanized means of cultivation is increasing. The use of fertilizers is steadily gaining popularity. Menace of water-logging and salinity is increasing.

The most effected Talukas are Khipro and Sanghar. The principal crops grown in the district are cotton, wheat, *bajra*, rape and mustard. A statement showing area and production of major crops during 1972-73 is given below :—

Crop	Area in acres	Production in tons
Cotton	238,563	258,715
Wheat	359,868	157,525
Rape and mustard	25,200	6,712
<i>Bajra</i>	36,325	6,139

1.9 HORTICULTURE

The main fruits grown in the district are mangoes, bananas, citrus, melons, *falsa* and water-melons. The orchards are mainly located in Shahdadpur, Sinjhora, Tando Adam, Berani, Shahpur Chakar, Sanghar, Jhol, Perumal, Khipro, Phulladyun, and Hinghorno. The total area under orchards in the district is 21,344 acres.

Vegetables grown in the district include lady fingers, *tindas*, cabbage, carrots, etc. A statement showing area and production of fruits and vegetables during 1972-73 is given below :

Fruits vegetables	Area in acres	Production in tons
Mangoes	14,000	30,860
Bananas	1,160	4,262
Musk melons	330	2,866
<i>Falsa</i>	30	55
Lemons	223	492
Oranges	75	138
Lady fingers	60	147
<i>Tindas</i>	50	37
Cabbage	73	257
Carrots	40	147

1.10 LIVESTOCK

Buffaloes, cows, goats and sheep are commonly found in the district. The district is known for Red Sindhi, *Kundhi* buff, *thari* breed of oxen, *koki* of sheep and *kamuri* of goats. According to 1972 Agricultural Census there are 235,000 cattle ; 96,000 buffaloes ; 90,000 sheep and 291,000 goats in the district.

1.11 MINING

There are no minerals in the district except salt, which is obtained from Dhilyar Salt Lake in Khipro Taluka. The salt depot at Dhilyar was opened in 1880.

1.12 INDUSTRIES

Large-scale industries include two textile mills, three ice factories and twenty-two cotton ginning factories in the district. Small scale industries include floor mills and power looms and hand-looms in the district.

1.13 COMMUNICATIONS

The metalled roads are 313 miles and un-metalled roads 163 miles. Sanghar town is not connected by rail. It is however, connected with Hyderabad by a metalled road and regular buses and taxis ply between these places. It is also connected by metalled roads with other important towns like Nawabshah, Shahdadpur, Tando Adam, Jamrao Head, Mirpurkhas and Khipro where buses ply regularly.

The Pakistan Railways line from Karachi to Peshawar passes through Tando Adam and Shahdadpur. The Pakistan Railways line from Hyderabad to Nawabshah also passes through the district.

1.14 TRADE

Sanghar District has several trade centres. Sanghar town has an old *bazar* known as Shahi Bazar which has

now been extended and is a large shopping centre. The items of trade are cotton, wheat, oilseeds, pulses and other agricultural products. All these commodities are exported while cloth, drugs, sugar, vegetables and other articles of daily use are imported. Shahdadpur is also a big trading centre as well as a *mandi* for agricultural produce like cotton, oil seeds, wheat and *bajra*. Sinjhora is another well known town for trade of agricultural commodities.

Branches of all important banks exist in the town. The Agricultural Development Bank is playing an important role to boost up agricultural activities in the district.

SECTION 2—HISTORY AND CULTURE

2.1 HISTORY

The district formed part of the territory which was ruled by the people of the Dravidian stock as far back as 3,000 B.C. The civilization of Moen-Jo-Daro founded by these people is one of the oldest in the world and existed side by side with the old civilization of Iraq and Egypt. These races were conquered by the Arayans who seem to have ruled the country till 711 A.D., when Muhammad-Bin-Qasim defeated Raja Dahar and overthrew the Brahman rule. Brahmanabad, now in ruin, situated in Sinjhora Taluka was brought under Arab sway at that time. It appears that a new city of Mansurah was built on the debris of Brahmanabad, but this city too was destroyed either by earthquake or by the change of course of the Indus or the lost Hakra river. The Arab rule continued upto 1026 when it was superseded by Turks who remained in power upto 1182. They in turn were succeeded by Ghoris (1182 to 1206) the Slave kings (1206 to 1290) and the Khiljis (Turks) (1290 to 1321). After 1321, the country owed allegiance to Soomras, whose history is more or less obscure. The last prince of this tribe, Hamir Soomro, was overthrown by the Samma chieftain, Unar by about 1351, A.D. The most illustrious ruler of this dynasty and by far the most able was Jam Nizam-ud-din (popularly known as Jam Nindo). He ruled Sind with absolute independence from 1470 to 1508 A.D. The period of his reign is considered to be the golden age of the native rule in Sind.

After the death of Jam Nindo, Darya Khan ruled Sind, on behalf of the minor prince Jam Feroze. Shah Hussain Argun defeated Darya Khan and ousted Jam Feroze but later restored him to the southern portion of Sind, including the area of present Sanghar District. Shah Hussain's death in 1554 caused division of the kingdom into two parts, the lower appropriated by General Mirza Issa Turkhan and the upper by Sultan Muhammad of Bhakkar. The Turkhanes ruled till 1612 when Emperor Akbar sent a large force under the command of Amir Mujahid Khan who conquered the territory and ruled as governor. The rule by governors lasted upto 1701. Then came Abbasi (Kalhora) dynasty. Most noteworthy of the Kalhoras were Mian Nur Muhammad 1718—1755 A.D., and Mian Ghulam Shah 1762—65 A.D. It was during the reign of the latter prince that the East India Company was allowed to establish trade centres at Thatta and Shah Bunder.

The Kalhoras were succeeded by the Talpurs (Mirs) in 1783 A.D., who in 1838 entered into a treaty with the British whereby an armed force of 3,000 was allowed to be established at Karachi and a British Resident was posted at Hyderabad. The East India Company after forcing various treaties on the Mirs, finally conquered Sind in 1843. The conquest was achieved by Sir Charles Napier. In 1843, the whole Sind was divided into three districts namely Hyderabad, Karachi and Shikarpur. Sanghar District formed part of Hyderabad and Sind remained a part of Bombay Presidency. In 1936, it became a separate province.

The present district, originally a part of the greater district of Hyderabad, was later split up, Shahdadpur and Sinjhora Talukas forming part of Nawabshah whereas Sanghar and Khipro of Tharparkar. This district was first created in 1947, but was dissolved in March 1948. It was re-established in 1949, and continued till 1950, and has been in existence since September 1953 on a permanent basis.

2.2 CASTES AND TRIBES

There are no distinct or well defined ethnic groups but the population of the district is a mixture of mainly

Aryans, Semites, and Dravidians and to some extent Mongoloids. The main group at present is that of Balochis who follow the tribal system. Rest of population falls into groupings which are based on criteria like caste, origin, language and occupation. The main tribes are Samats, Rajputs, Syeds, Punjabis, Pathans and Baloch.

2.3 FOOD

The diet of the rural population consists mainly of wheat, bread and butter-milk (*lassi*) for breakfast and lunch and wheat bread with milk or gram for supper. *Bajri*, rice or *jawar* bread is also used. Rice, meat, vegetables and fish are subsidiary foods. Vermicelli, *halwa*, poultry and meat preparations are a speciality on special occasions. The well-to-do class uses more rich food e.g., *pulao*, *chashni*, meat and wheat bread.

2.4 DRESS

The Samat males generally wear a white heavy *shalwar*, a coloured long shirt and a white turban. They wear slipper or locally manufactured *juti*. The women wear cotton *shalwars* known as *garbi* and long embroidered shirts. A *dupatta* of printed cloth is used to cover the head. Red colour is preferred by the women. There is no difference between summer and winter clothing except the use of a *ajrak* a printed cotton sheet used by both sexes in winter. The males also wear woollen coats. Clothes worn on festivals are more or less the same except that they are new and of little expensive material.

The Balochi males use heavier *shalwar*, longer shirts and bulkier *turbans*. The *shalwars* worn by women are of coloured fabric known as *susi* or *garbi*. Their shirts are embroidered and of red colour with broad sleeves known as *ghanghas*. They use *dupattas* as a head wear.

The Punjabi males wear *shalwars* or a *tahmad* and shirts. They usually use turbans and Multani *jutis*. The

women dress is the same as the males except that they use *dupattas* as a head wear.

2.5 DWELLINGS

The people in rural areas usually live in mud huts known as *landhies*. The huts are square or rectangular and sometimes have sloping roof of thatch with wooden doors. The huts are enclosed by fences and thorny branches of *babul* trees or *berry* trees.

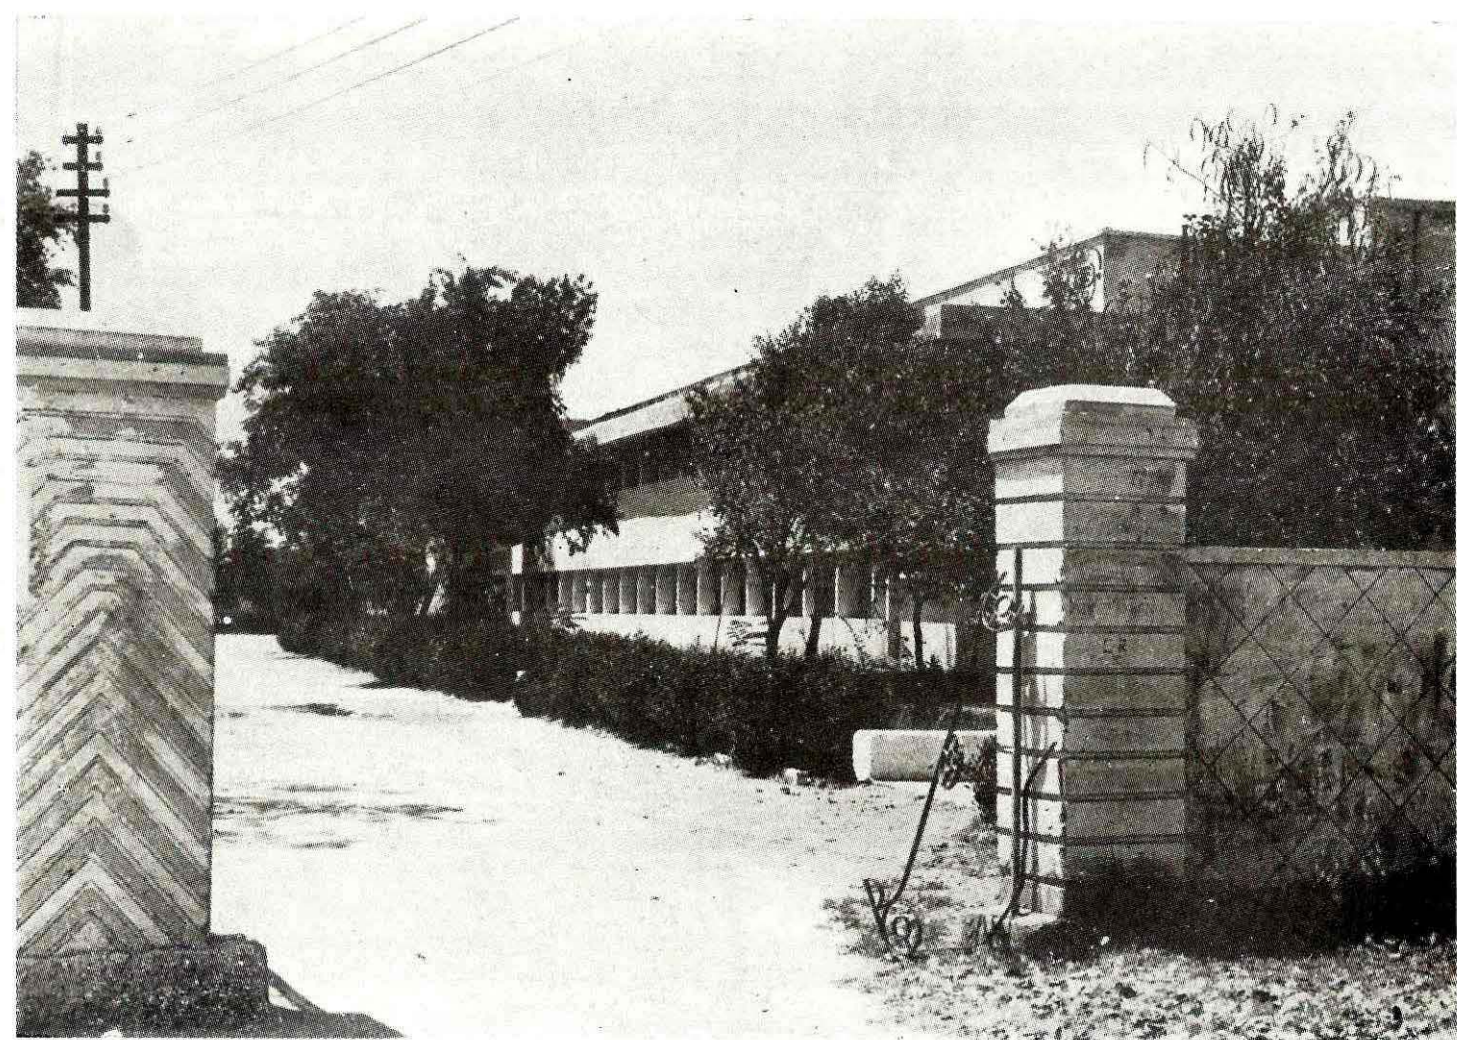

2.6 OCCUPATIONS

The main occupation of people is agriculture. Majority of non-cultivators shift to other areas for earning purposes during harvesting season. The life in urban area is quite different from rural area. Women in urban area usually keep themselves busy in household affairs. On rare cases women assist their husbands in earning their livelihood by doing stitching and embroidery work. Pure milk, *ghee* and butter is also a source of earnings of the people living in villages.

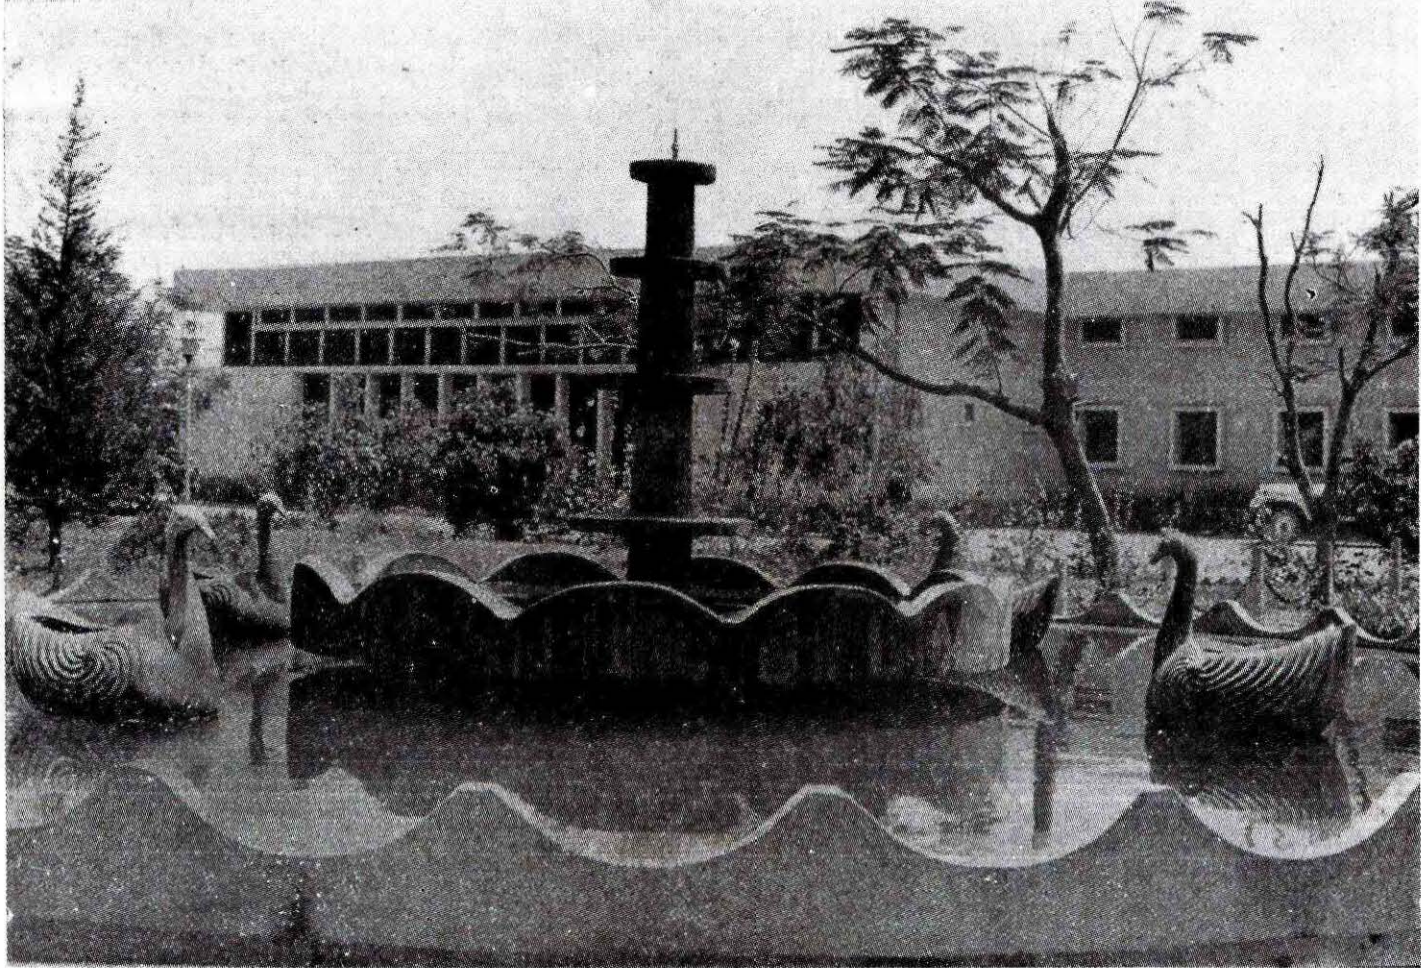

2.7 CULTURE, CUSTOMS AND TRADITIONS

Arrangement of marriage is the responsibility of parents when their children attain the age of puberty. For avoiding family disputes, parents sometimes marry their children in their early ages. Marriage ceremonies include traditional songs sung by women of the family. Dowry is given to the brides according to the financial positions of the families.

The 7th day after the birth of the child is celebrated by the parent, which is called as *Chathi*. Death rites both social and religious continue upto the 40th day. The women after the death of their husbands put off all the ornaments, wear simple clothes and confine themselves to the house.

Government College, Sanghar.

Civil Hospital, Sanghar.

SECTION 3—ADMINISTRATIVE SET-UP

3.1 EXECUTIVE, JUDICIARY AND REVENUE SYSTEM

The district is under the general charge of a Deputy Commissioner who combines the functions of a District Magistrate as well as Collector. He is also responsible for co-ordination of the functions of all nation building departments in the district. On the judicial side he is assisted by Additional Deputy Commissioner and Magistrates, while on revenue side he is assisted by an Additional Deputy Commissioner with a *Mukhtiar* and a head *Munshi* in each Taluka. For revenue administration the district is divided into two sub-divisions, viz., Shahdadpur and Sanghar and four Talukas namely Shahdadpur, Sinjhora, Sanghar and Khipro.

The police administration is vested in the Superintendent of Police who is assisted by two Deputy Superintendents of Police on executive side and one at Police Headquarters. The district is divided into ten police stations.

The judicial administration of the district is under the charge of a District and Sessions Judge who is assisted by three Civil Judges.

3.2 EDUCATIONAL FACILITIES

The educational set-up is under the supervision of a District Inspector of Schools stationed at Sanghar who is assisted by Assistant District Inspectors of Schools. In 1972 the literacy ratio in the district was 19.5%. A statement showing number of schools, colleges and students during 1972-73 is given below :—

Institution/Enrolment	Primary	Middle	High	College
No. of Institutions	768	26	24	4
No. of students	42,409	960	6,635	1,255

3.3 MEDICAL FACILITIES

There is one District Headquarters Hospital in Sanghar, one Tehsil Headquarter Hospital at Shahdadpur, three Health Centres and ten dispensaries in Sanghar Sub-division and nine in Shahdadpur Sub-division. Besides there are maternity Homes at Khipro, Tando Mitha Khan, Kandiari, Sinjhora and Tando Adam.

SECTION 4—IMPORTANT HISTORICAL PLACES

4.1 SHAHDADPUR

Shahdadpur town is situated on main railway line 50 miles in the north of Hyderabad and 25 miles in the west of Sanghar. It was founded by Mir Shahdad Khan Talpur. It is a Sub-divisional as well as Taluka headquarters. It has a railway station on main line and is connected with Tando Adam, Sinjhora, Nawabshah, Hyderabad, Sanghar by metalled roads. There is one high school for boys, one for girls and a degree college. This is a trade centre for agricultural goods, like cotton, oil seeds, wheat and *bajra*. Three cotton ginning factories and one textile factory is functioning in this town.

4.2 RUINS OF KOT BIJAR

The ruins of a Talpur fort are located in Deh Kot Bijar, Taluka Sinjhora and can be reached from Udhpur on the Shahdadpur—Sanghar Road via Shahu Branch. The ruins cover an area of 40 to 50 acres and contain a graveyard and a mud fort covering more than two acres.

4.3 KUBA MIR SHAHDAD

It is situated 4 miles from Shahpur Chakar and consists of a graveyard covering an area of about four acres. There is a mosque and some large tombs made of Jaipur sandstones. The Tomb of Mir Shahdad, the founder of Shahdadpur town is located here and the graveyard is also named after him. The tombs and mosque are about 200 years old and are at present in dilapidated condition.

4.4 BRAHMANABAD (MANSURAH)

Brahmanabad (Mansurah) is a place of historical and archaeological interest about 8 miles east of Shahdadpur in Sinjoro Taluka. It attracts a large number of tourists. The ruins are about four miles in circumference. The whole space is covered with mounds of broken and crumbled bricks, some of them fifteen feet high with a few clean spaces. There are no stones, but occasional lumps of charred wood which indicates use of timber in the buildings. The question of the identity of these ruins has been a matter of controversy for a long time. Briefly the historical background is as follow.

In 711 A.D. when Muhammad-Bin-Qasim conquered Sind, there was a Hindu city by the name of Brahmanabad. Major H.G. Raverty in his book *Mihran of Sind and its Tributaries* points out that this city was founded about 480 B.C. by Bahman son of Asfandiyar and was known as Bahmanabad or Bahmaniah. Under the Arab rule this town disappeared and new town Mansurah or Mansuriyah emerged on the ruins of Brahmanabad. It became the principal and more prosperous town of Sind. After

Mahmud Ghazanvi when Hindus regained power in this area, the town of Mansuriyah also disappeared. In 1854 historian Bellasis explored the ruins of this town and located the site of the old city to the east of Shahdadpur. Major General Haig, however states that the ruins discovered by Bellasis were that of Mansurah and the ruins six miles to the north-west were the remains of Brahmanabad.

In 1879, when H. Cousens, Superintendent of Archaeological Survey, Bombay, made deep excavation into the ruins of Brahmanabad came to the surprising conclusion that both Bellasis and Haig were right. He found convincing evidence that the remains were of two cities one of which had been built on the debris of the other. The lower was Brahmanabad but the upper unmistakably Mansurah. The foundation of several mosques were found and numerous coins were recovered with Arab inscriptions some of which Cousens states to be those of the eastern Khalifas, which might have been brought to Sind by the Arabs.

Further details of this historic town may be seen in the Gazetteer of the Province of Sind B, Volume V Nawabshah District.

Tomb of Mir Shahad Khan, the founder of Shahadpur.

The ruins of Brahmanabad.

SECTION 5—POPULATION

5.1 GROWTH AND DISTRIBUTION

The total population of Sanghar District was 693,407 according to the 1972-Census, whereas it was 430,090 in the 1961-Census. The percentage increase during the intervening period of 11 years and 8 months between the two censuses was 61.2% with an annual growth rate of 4.2%. The following statement also shows at a glance the variation in population from 1951 onward :—

Description	1951	1961	1972
Population	322,212	430,090	693,407
Increase/decrease over last census	—	107,878	263,317
Percentage increase decrease	—	33.5	61.2

The total area of the district is 4,142 square miles which gives a population density of 167 persons per square mile.

The urban population of the district was 131,586 (i.e. 19.0%) and the rural population was 561,821 (i.e. 81.0%). The percentage increase in urban and rural areas

during the last two censuses was 87.1% and 56.2% respectively against the total increase of 61.2%.

5.2 COMPOSITION

The male and female population was 371,480 and 321,927 respectively, giving a sex ratio of 1,153 against 1,225 in the 1961 Census.

The infant (less than one year) population was 15,705 (i.e. 2.3%), 32.6% were less than 10 years and the adult (18 years and above) population was 51.8%.

The population of 10 years and above was 467,392 out of whom 150,750 (i.e. 32.3%) were never-married, 285,160 (i.e. 61.0%) were married 31,140 (i.e. 6.7%) were widowed and 342 (i.e. .07%) were divorced.

Out of the total population of 693,407 the Muslim population was 579,764 (i.e. 83.6%). Caste Hindus came after Muslims whose population was 76,484 (i.e. 11.0%).

The literacy ratio of the district was 19.5% for both sexes and 29.4% and 7.3% for males and females respectively. In urban areas the literacy ratio was 36.0% for both sexes and 48.1% and 21.2% for males and females respectively. In rural areas the literacy ratio was 15.5% for both sexes and 25.0% and 4.0% for males and females respectively.

CENSUS PUBLICATIONS

1. CENSUS BULLETIN 1

This bulletin contains provisional population figures by sex and variation between the 1961 and 1972 Censuses in respect of Provinces, Divisions, Districts and 20 big cities of Pakistan. (Price Re. 1.00)

2. DISTRICT CENSUS REPORT

There is one report for each district containing its description, *i.e.*, geography, history and culture, administrative set-up and important historical places of the District and statistical tables. (Price Rs. 10.00)

3. CENSUS REPORT OF FEDERALLY ADMINISTERED TRIBAL AREAS

This report is in respect of the federally administered tribal areas and similar to the District Census Reports. (Price Rs. 10.00)

4. CENSUS REPORT OF FEDERAL CAPITAL TERRITORY, ISLAMABAD

This report is also similar to the District Census Reports. (Price Rs. 4.00)

5. PROVINCIAL CENSUS REPORT

This report describes briefly the geography and population dynamics of each Province. There are 10 tables for each Province with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different.

(Price :—Punjab Rs. 25.00 ; Sind Rs. 22.00 ; N.W.F.P. Rs. 20.00 ; Baluchistan Rs. 15.00)

6. PAKISTAN CENSUS REPORT

This report includes the 1972 Census methodology and procedures and short description of Pakistan's geography and population dynamics. There are 10 statistical tables for Pakistan with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different. (Price Rs. 25.00)

7. ADMINISTRATIVE REPORT

This publication contains Census Commissioner's report in respect of the administrative planning and methodology of the 1972 Census. (Not for sale)
