## ISO 9001

At National Foods, we selected ISO 9001 as our model for Quality Assurance. ISO 9001 is the most comprehensive quality standard available internationally. It covers all activities in the product cycle from product idea to post-sales consumer behaviour. This rigorous standard introduces modern systems techniques to product design/development, production, installation and servicing.

# Research & Development

We aim to build a team of innovators at National Foods in order to conceive and nurture pioneering products for the future.

It is our goal to create products with a difference,

combining sensation with science,

and Pakistani tastes with Western technology.

# Quality Assurance

We aim to maintain international standards of quality in all our products through our TQM (Total Quality Management) system and HACCP (Hazard Analysis Critical Control Points) programme,

# Technology

We aim to improve quality, productivity and efficiency

by investing in new technologies and modernising our production facilities. We intend to adopt the newest, most appropriate technologies at National Foods.

#### Organisational Development

We aim to support our Corporate Growth Plan with a modern, flexible, proactive and responsible organisation, capable of meeting the challenges of the future.

# Chairman's Review

#### MOVING AHEAD

Inspite of the turbulent conditions prevailing around us, National Foods Limited has completed another successful year, There are many bright features;

- a) Gross Sales increased approximately, 27.6%, inspite of decline in export sales.
- b) Pre-tax profit increased by 48.7% which by any standard reflects excellent management of all the resources.
- c) Consumption of material percentage is favourable as compared to the past year which was made possible by continuous process improvement and efficient process control.
- d) Reduction in financial expenses is the result of efficient use of financial resources.

Your company is moving towards its declared objectives rapidly which are:-

- 1. Imaginative marketing and careful cost control.
- 2. Introduction of new products in the range of convenience food of Ultra High Quality.
- 3. Entrance into Global Food Market of processed Food Varieties.
- 4. Introduction of better Packaging, to face the Environmental Laws in export markets.

My congratulations to the team for getting National Foods Ltd., ISO 9001 CERTIFICATION. Your Company is entering the new year full of confidence and hopefully we will see an upsurge in Export during the current year. We are also hoping to see value chain systems in place throughout our processes including procurement and storage.

Congratulation again to the young team for continuous progress.

#### A. MAJEED

Chairman

# Chief Executive's Annual Report to the Shareholders for the year

It gives me great pleasure once again to present before you the annual performance of your company for the year 1997-98.

# PERFORMANCE

The company has ended the year with a total Sales figure of Rs. 628,932,228, with a growth of 27.6 % over last year's Gross Sales. These Sales were achieved through a Local Growth of 35.4 % and a disappointing decline of 7.94 % in Exports.

The decline in Exports was caused mainly in the Saudi Arabian market. The reason was expulsion of large number of illegal immigrants in a clean up exercise. As the large number of immigrants were Ethnic based, this resulted in a temporary setback in exports due to a somewhat recessionary phase in that market.

# QUALITY MANAGEMENT

For the past couple of years, the company is seeing stagnant or negative growth in the Export markets. This has made us realize that we have to strengthen our Export Marketing Infrastructure and develop products that are geared towards the Mainstream Markets.

With this mission in front of us, the company embarked on a challenge in February 1998 to certify its quality through international standards as set forth through ISO 9000. The discipline selected was ISO 9001 as it certifies our development and process at the same time thus enabling us to market our products with a guaranteed support for the international market.

By the grace of God and the very hard work of our Management, the company was successful in acquiring the certification in only 9 months, thus enabling us to be positioned on a strong platform in all the markets. ISO 9001 has proven to be a strong discipline for our team as it has helped us in streamlining our system so that future growth can be handled easily.

#### PRODUCT DEVELOPMENT

In our bid to sustain our growth and also to diversify ourselves into a food company, new products are

being launched and developed for the local as well as the export market. A lot of interesting projects are being worked at, this moment.

These products will help in establishing a clear positioning in the local as well as the export market. The products for the Export Market are being designed to meet the challenge of separate markets in terms of taste profiles, quality packaging and quality standards. Hopefully this strategy will boost our Export sales and give us stability for the future. We also hope to contribute heavily to the country's much needed foreign exchange.

#### OTITI-OOK

As against the current financial crisis that the crisis that the country is facing, the outlook for the company on the other hand is quite encouraging. Despite problems of L/C margin's and elevated costs at all domestic levels, the company is working continuously and very hard in terms of reducing expenditure.

Work is being done by Re-engineering a lot of old processes to make them more efficient. This is being brought about by Work, Time and Motion studies by deploying Industrial Engineering principles. A dedicated department for this very purpose has been created and through their recommendations, automation and new work methods are being designed and deployed at the floor level. This should help us in reducing our process wastage as well.

Through all these measures the company hopes to achieve and sustain its present rate of growth and deliver a higher net return in the future for its shareholders.

#### DIRECTORS

During the yea/under report, the following changes have taken place in the Board of Directors. The following directors were elected un-opposed for three years, in the last Annual General Meeting held on 27th December 1

CHIEF EXECUTIVE

Notes to the Accounts For the year ended 30 June, 1998

#### 1. ACCOUNTING POLICIES:

#### 1.1 Accounting Convention:

These accounts have been prepared on historical cost convention without taking into account the effect of inflation or current cost.

#### 1.2 Taxation:

The provision for current taxation is based on taxable income at the current rates of taxation after taking into account available tax rebates and credits.

The company provides for deferred taxation, if any, using the liability method. However, no provision is made if it is estimated that this would not reverse in the foreseeable future.

## 1.3 Staff Retirement Benefits:

The company operates a funded gratuity scheme covering all permanent employees and is calculated on the basis of 30 days of the last drawn salary and length of service of the employees. Provision to cover this obligation is made annually.

The company also operates a funded provident fund scheme, covering all permanent employees. Monthly contribution is made at the rate of 5 percent of the pay of employees to the fund

# 1.4 Fixed Assets and Depreciation:

All fixed assets except lease hold lands and capital work-in-progress are stated at written down value which is arrived at by deducting accumulated depreciation from cost. Lease hold lands and capital work-in-progress are stated at cost. Cost in relation to certain fixed assets signifies historical cost and cost of borrowing during construction period in respect of loans taken for specific project.

Depreciation is charged on reducing balance method whereby the cost of asset is written off over its expected useful life. Maintenance and normal repairs are charged to income. Major renewals and replacement are capitalised and the assets so replaced, if any, are retired. Full year's depreciation is charged on assets acquired during the year whereas no depreciation is charged on assets deleted. Gains and losses on disposal of assets are included in income currently.

# 1.5 Assets subject to Finance Lease:

Assets subject to finance lease are stated at the lower of present value of minimum lease payments under the lease agreement and the fair value of the assets. The related obligations of the lease are accounted for as liabilities. Assets acquired under finance lease are amortized over the useful life of the asset on a reducing balance method at the rates given in the relevant note. Amortization of leased assets is charged to current year's income.

#### 1.6 Stock-in-Trade:

Raw materials, work-in-progress and packing materials are valued at average cost whereas finished goods are valued at lower of cost and net realisable value. Appropriate manufacturing overheads are included in the cost of finished goods. Goods-in-transit are stated at cost.

## 1.7 Foreign Currency Translation:

Assets and liabilities in foreign currencies are translated at the rates of exchange prevailing on the balance sheet date. The resulting gains and losses are charged to current year's income.

## 1.8 Revenue Recognition:

Revenue is recognised on the basis of sales which are recorded at the time of despatch of goods. Returns are booked as and when advised. Goods are sold subject to reservation of title, as is customary in this trade.
